

Progression in Relationships and Sexual Education

Bamburgh School

School believes that students should learn about their own sexual development, together with an awareness of their relationships with others and this can greatly enhance the students' ability to lead their lives completely and with fulfilment.

Friendship

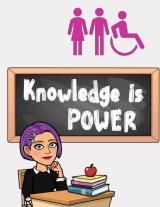

Students will be taught by class teams in Primary and tutors in Secondary. Mrs McDowell will deliver some topics across the whole school as and when the need arises.

SRE/RSE will be delivered during PATH lessons and is timetabled in across the whole academic year.

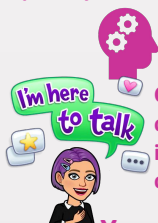

Teaching

Students are given a set of ground rules for all discussions. Students are taught at age-appropriate times decided by the class teacher. All staff are aware of students who have suffered trauma and will decide the right place and right time to deliver.

EYS KS1&KS2

We teach SRE in Early Years classes as an integrated part of the topic work covered during the year. Our teaching of SRE discreetly aims to match a child's developing personal, emotional and social development. We support a child's SRE education in Early Years as we develop their knowledge and understanding of building suitable friendships, stranger danger and personal privacy.

Communication

Children will be encouraged to communicate their opinions and ideas in the form which they feel comfortable.

Year 9

Students will be taught about FGM, forced marriage, harassment and look in detail at the issues of domestic violence and domestic abuse in families.

Personal, Aspirations, Teamwork and Health

The Body

Children will learn about their bodies, how they grow and develop and the emotions which go with puberty. They will learn how babies are conceived, develop and are born. We will explore the issues surrounding gender and sexuality. The issue of consent starts in EY and continues all the way through to year 11.

Hygiene

Students will learn about the importance of Hygiene from washing hands to the need to keep clean during puberty.

Puberty

Puberty will be discussed in terms of male and female development. We tend not to split classes when discussing periods as we feel it is necessary for boys to equally understand the process.

Contraception

During KS4 students will have lessons discussing various methods of contraception and the pros and cons of each. They will also have the option to put a condom on a model penis during one of these lessons.

Online Safety

Students will be taught about online sexual exploitation of children. How to stay safe online from grooming, sharing and sending inappropriate images and chat rooms.

#Relationship Goals

Family and Friendships

Students will learn about all types of families including same sex partnerships. Students will always cover making good choices in relationships in all year groups. The solid building of friendships is a key factor in students having a safe future.

Who to talk to?

If you require any more information, then in the first instance contact the school office. Mrs McDowell is the teaching lead for Sex and Relationships Education, and she will be happy to answer any of your queries.

Any questions?
