

It all started in the summer of 2004, when I saw all the cool kids on stage playing in bands and I really wanted to join them under the bright lights. Luckily my dyslexia tutor who was a singer in a band saw the interest and turned up one day with a really nice guitar...

It was so important to have a teacher who believed in me, inspired me, saw my potential, wanted the best for me, and encouraged me to chase my dreams, now it's my turn to do that for you.
