APPENDIX 1: REDNOCK SCHOOL MEDICAL HEALTH PLAN TEMPLATE	7
APPENDIX 2: BEING NOTIFIED A CHILD HAS A MEDICAL CONDITION.....	10

1. Aims

This policy aims to ensure that:

- Students, staff and parents understand how our school will support students with medical conditions
- Students with medical conditions are properly supported to allow them to access the same education as other students, including school trips and sporting activities

The Governing Body will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of students' conditions, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support students with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant students
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is Mrs Kerala Cole. They will work in conjunction with the lead for First Aid in School and the student's community and teaching teams to ensure that the student's medical needs are met.

2. Legislation and Statutory Responsibilities

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting students at their school with medical conditions. It is also based on the Department for Education's statutory guidance on [supporting students with medical conditions at school](#).

3. Roles and Responsibilities

3.1 The Governing Body

The Governing Body has ultimate responsibility to make arrangements to support students with medical conditions. The Governing Body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

3.2 The Head Teacher

The Head Teacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation;
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations;
- Ensure that all staff who need to know are aware of a child's condition;
- Take overall responsibility for the development of IHPs;
- Make sure that school staff are appropriately insured and aware that they are insured to support students in this way;
- Contact the school nursing service in the case of any student who has a medical condition that may require support at school, but who has not yet been brought to the attention of the First Aider;
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date.

3.3 Staff

Supporting students with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to students with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support students with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so. Members of the lead pastoral team will work with parents, students and the SLT member in charge of IHPs to make sure that students' needs are met and support is provided.

Teachers will take into account the needs of students with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a student with a medical condition needs help.

3.4 Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs;
- Be involved in the development and review of their child's IHP and may be involved in its drafting;
- Carry out any action they have agreed to as part of the implementation of the IHP, e.g. provide medicines and equipment, and ensure they or another nominated adult are contactable at all times.

3.5 Students

Students with medical conditions will often be best placed to provide information about how their condition affects them. Students should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

3.6 Lead First Aider

As part of the school's admissions process, parents/carers are required to declare any medical conditions. They will then be asked to complete a Medical Care Plan Form (Appendix A), outlining the condition and providing details of any treatment required.

The Lead First Aider will review the information provided and may contact parents/carers to request further information or arrange a meeting.

For students whose health needs are identified within their EHCP, the Lead First Aider and the SEND Team will work collaboratively to create an appropriate medical care plan. The final version of the plan will be uploaded to Provision Maps and made accessible to all staff via Class Charts.

4. Equal Opportunities

Our school is clear about the need to actively support students with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these students to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that students with medical conditions are included. In doing so, students, their parents and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

When the school is notified that a student has a medical condition, the process outlined below will be followed to decide whether the student requires an IHP or a PEEP (Personal Emergency Evacuation Plan)

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for students who are new to our school. See Appendix 2.

6. Individual Healthcare Plans

The Head Teacher has overall responsibility for the development of IHPs for students with medical conditions. This has been delegated to the senior leader in charge of Student Development. The Assistant Head Teacher will work closely with the lead pastoral team to ensure that IHPs are correctly identified, written, reviewed and communicated.

Plans will be reviewed at least annually, or earlier if there is evidence that the student's needs have changed.

Plans will be developed with the student's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all students with a medical condition will require an IHP. It may be that a student's needs can be clearly defined in their My Profile documentation. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the Head Teacher will make the final decision.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the student's specific needs. The student will be involved wherever appropriate.

IHPs will be linked to, or become part of, any Education, Health and Care (EHC) plan. Students with Special Educational Needs and Disabilities (SEND) who do not have an EHC Plan, the SEND will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The Pastoral Team member or Student Development team member leading on the development of the IHP, will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments;
- The student's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons;
- Specific support for the student's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- The level of support needed, including in emergencies. If a student is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring;
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the student's medical condition from a healthcare professional, and cover arrangements for when they are unavailable;
- Who in the school needs to be aware of the student's condition and the support required;
- Arrangements for written permission from parents for medication to be administered by a member of staff, or self-administered by the student during school hours;

- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the student can participate, e.g. risk assessments;
- Where confidentiality issues are raised by the parent/student, the designated individuals to be entrusted with information about the student's condition;
- What to do in an emergency, including who to contact, and contingency arrangements.

7. Managing Medicines

Prescription and non-prescription medicines will only be administered at school:

- When it would be detrimental to the student's health or school attendance not to do so;
and
- Where we have parents' written consent.

The only exception to this is where the medicine has been prescribed to the student without the knowledge of the parents.

Students under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a student any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will always be informed.

The school will only accept prescribed medicines that are:

- In-date;
- Labelled;
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage.

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Students will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to students and not locked away.

Medicines will be returned to parents to arrange for safe disposal when no longer required.

7.1 Controlled Drugs

Controlled drugs are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A student who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another student to use. All other controlled drugs are kept in a secure cupboard in the First Aid room or in the SEN Locker outside the hygiene suite, and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

7.2 Students Managing Their Own Needs

Students who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents and it will be reflected in their IHPs. Students will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a student to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents so that an alternative option can be considered, if necessary.

7.3 Unacceptable Practice

School staff should use their discretion and judge each case individually with reference to the student's IHP, but it is generally not acceptable to:

- Prevent students from easily accessing their inhalers and medication, and administering their medication when and where necessary;
- Assume that every student with the same condition requires the same treatment;
- Ignore the views of the student or their parents;
- Ignore medical evidence or opinion (although this may be challenged);
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs;
- If the student becomes ill, send them to the school office or First Aid room unaccompanied or with someone unsuitable;
- Penalise students for their attendance record if their absences are related to their medical condition, e.g. hospital appointments;
- Prevent students from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their student, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs;
- Prevent students from participating, or create unnecessary barriers to students participating in any aspect of school life, including school trips,
- Administer, or ask students to administer, medicine in school toilets.

8. Emergency Procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All students' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a student needs to be taken to hospital, staff will stay with the student until the parent arrives, or accompany the student to hospital by ambulance.

9. Training

Staff who are responsible for supporting students with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to students with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the lead member of staff for each case. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the students;
- Fulfil the requirements in the IHPs;
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures.

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

10. Record keeping

The Governing Body will ensure that written records are kept of all medicine administered to students for as long as these students are at the school. Parents will be informed if their student has been unwell at school.

IHPs are kept in a readily accessible place, on SIMs, Provision Maps and Class Charts, which all staff are aware of.

11. Liability and Indemnity

The Governing Body will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are:

Insurance cover in place with DfE Risk Protection Arrangement (RPA) Scheme . Employer liability insurance is in place against liability for bodily injury or death/disease sustained by our employees arising out of and in the course of their employment.

12. Complaints

Parents with a complaint about the school's actions in regards to their child's medical condition should discuss these directly with the child's tutor or community leader in the first instance. If clarification is still needed or there are further concerns this should be escalated to the SLT member in charge of Student Development. If they cannot resolve the matter, they will direct parents to the school's complaints procedure.

13. Monitoring Arrangements

This policy will be reviewed and approved by the Governing Body every year.

14. Links to Other Policies

This policy links to the following policies:

- Accessibility Plan
- Complaints Policy
- Equality Information and Objectives
- First Aid
- Health and Safety
- Child Protection Policy
- SEND Policy

Appendix 1: Rednock School Medical Health Plan Template

Rednock School
where everyone matters

Medical Care Plan 2026

Please complete this form if your child has any medical conditions. Not all questions will be relevant to every condition however we ask that you complete with as much detail as possible to inform our First aid team.

Following the introduction of 'Benedict's Law' if your child has an allergy that requires them to carry an Epi-pen, please could you provide a copy of their Allergy Action plan (BSACI preferred) which will have been written by their medical professional.

If you have any supporting documentation, such as letters from the GP etc, please send these to admin@rednockschool.org.uk with the subject 'Additional documentation for Medical Care Plan'. Please ensure your child's name can be found within the email.
