

Volcanoes – Escape from Pompeii!

This term, year 3 have been learning all about Volcanoes.

We have learned about the structure of our planet and how volcanoes are formed. We found it really interesting learning about how a volcano erupts.

In Literacy we have been reading the story 'Escape from Pompeii.' This story was about two young children who managed to escape the volcano eruption by hiding on a boat which took them to a safe place. We had a go at writing our version of this story. We 'magpied' some ideas; changing some of the key events to make it into our own version.

We couldn't believe that this story is based on real life events and we found it so interesting to hear how archaeologists have managed to unearth a lost city after so many years!
