

### Year 5: Brilliant Botanists

We have two students who are able to come into school while the rest of year 5 are isolating, so today our little class have been working on our autumn term science topic living things. We have already studied a range of animals and today we our super-scientists have started to look at plant reproduction and life cycles. They have been investigating the seeds that can be found in a variety of fruits and looking at all of the different ways plants can reproduce. We had lots of fun disassembling apples, bananas, lemons, satsumas, pears and pomegranates!
