November 2019

Dear Parents/Carers

**<u>Part 2 HPV Vaccination for Year 9 girls</u>**

A team of School Health Nurses will be attending **Langtree School** on **Friday 13th March 2020,** to administer the second dose of the HPV (Human Papilloma Virus) vaccination to all female students in Year 9.

The first dose was given when your daughter was in Year 8 and your Consent was obtained for both doses to be administered. **<u>You do not need to provide further consent or complete the electronic consent form for this vaccine</u>**. It is important that both doses are given to provide optimum protection against the commonest causes of cervical cancer.

If your daughter has not received her first dose please call your School Health Nurse Office. We will then administer the first dose on the date above and arrange the second dose to be given 6-12 months later. If your daughter is unable to receive her immunisation on the date above due to absence, we will arrange to catch her up in school later.

If your daughter has developed any allergies, medical conditions or commenced any medication since the Consent Form was signed last year or you wish to discuss this important immunisation with a school health nurse, please phone the School Health Nurse Office on the number below.

Further information regarding the vaccine is available at www.nhs.uk/hpv

Yours faithfully,

Fiona Singleton
Immunisation Team Lead
