

Computer Science A-Level

Research Operating Systems

1. Why do computers require operating systems? List and explain some of the key tasks which they perform.
2. The following are a list of operating systems:
 - MS-DOS
 - UNIX
 - Windows
 - MAC OS
 - Android
 - iOS

Write about a paragraph on each, describing their history, the systems on which they run and their key features.

Additional activity to help prepare you for programming in C#.

Use the following C# tutorial to familiarise yourself with the fundamentals of C#:
