

Part 2 HPV Vaccination for Year 9 students

A team of School Health Nurses will be attending Langtree School on 23/02/2021, to administer the second dose of the HPV (Human Papilloma Virus) vaccination to all students in Year 9. Please be aware that this date may be subject to change. Further information is available on our website: www.oxfordhealth.nhs.uk/school-health-nurses .

The first dose was given when your child was in Year 8 and your Consent was obtained for both doses to be administered. **You do not need to complete the electronic consent form again for this vaccine.** It is important that both doses are given to provide optimum protection against the commonest causes of HPV related cancers.

If your child has not received their first dose please call the Immunisation Team Assistant. We will then administer the first dose on the date above and arrange the second dose to be given 6-12 months later. If your child is unable to receive their immunisation on the date above due to absence, we will arrange to catch them up in school at a later date.

If your child has developed any allergies, medical conditions, commenced any medication or has already had their second dose since the Consent Form was signed last year, please phone the Immunisation Team Assistant on the number below.

Further information regarding the vaccine is available at www.nhs.uk/hpv
