

Year 3 Autumn 1 2020

What a great start to the year. We are working really hard on our joined handwriting and we have made great progress. In English we have been telling stories out loud, writing monster reports as well as creating synonym poems. We have explored traditional tales as well as Here We Are, which the whole school read.

In Maths, we have been practising quick as a click recall of x2, 5, and 10 times tables. We are thinking about what else we know linked to these known facts. We practise number bonds regularly as well as mental addition and subtraction. We have investigated 2D shape and used a geoboard to make shapes.

In Science we have been finding out about the human body. We have learned about joints, muscles and bones.

In Geography we have found out about Sunderland. We can use a map to identify the physical and human features in our city and have created a factsheet to explain why Sunderland is so cool!

What is coming up?

English: postcard writing, exploring story writing and biographies.

Maths: $\times 3, 4, 6, 8$, addition and subtraction, 3D shape, measures (time, mass, capacity, length)

Science: How can Usain Bolt move so quickly?

History: Who first lived in Britain?

RE: How and why is advent important?
