

Year 6 – Spring Term Two

Spring term has been very busy for year six and we have all worked hard and tried to do our best. These are some of our highlights.

STEM (Science, Technology, Engineering and Maths) Career Week:

Year 6 have been thinking about careers in engineering, science, maths and technology this week. With help from Nissan the children have studied Japanese culture, created their own Daruma Dolls, took part in a production line creating a working car, completed the chopstick challenge and have designed their own car of the future. At the beginning of the week we had 8 children, one being female who had thought about a career in engineering; by the end of the week we had 19 children, 8 of the female who would now like to be an engineer. This is good news for the future of STEM!

E-safety:

Year 6 have been talking about e-safety this week with our local police officer, PC Tom Scott. They have learned all about the dangers of the most popular apps and websites and how to keep themselves safe on them; how to identify and avoid online scams; and they have also learned how they can ensure they are responsible online.

Summer Term One:

- History: Who were the Mayans and what can we learn from them?
- Science: What would a journey through your body be like?
- English: Narrative - *Nevermoor* by Jessica Townsend
- Maths: Fractions, Decimals and percentages, shape, problem solving and reasoning.

Happy Easter from all of us in Year 6!
