

Year 3 Spring 2 2021

Science lessons have been all about rocks and fossils. We investigated rocks and found out types of rocks: igneous, sedimentary and metamorphic. We had fun during Science week creating wormeries.

In Maths it has been fun doing practical activities related to length. We have covered Statistics – creating tally charts, pictograms and bar charts. We have begun to develop column methods for addition and subtraction.

In English we enjoyed writing about The Twits and making up information about the Roly Poly bird. We have written about the Pied Piper as well as creating calligrams and shape poems connected to Spring and Easter.

In History we have been finding out about Ancient Egypt. We looked at life as an Egyptian pyramid builder and features of the era.

Coming up in Summer 1

- Persuasive writing
- Number and shape/lines
- Geography connected to the Mediterranean

- Plants
- Hinduism
- Magnets
