

Nursery– Summer 1.

This half term in Nursery we have really enjoyed learning all about Growing. This has meant spending lots of time outside in the fresh air exploring the natural environment.

We have learned that things are better when we work together as a team.

We have built some interesting structures with the construction materials

We have built an assault course which really tested our physical skills.

We can't wait for next term when the better weather arrives and we can really start to see our plants and seeds growing.

We have learned a lot about looking after animals and nature
