

Year 3 Summer 2 2021

In Maths we have been revising fractions and finding out about equivalence. We have explored symmetry and thought about drawing lines and shapes accurately.

In English we have done work connected to The Iron Man by Ted Hughes. We have acted out the opening of the story as well as thinking about what could happen next. We have also explored a range of poetry styles and created an acrostic poem and a poem using similes. We have been focusing on using powerful verbs.

Science lessons have been about plants this term. We explored the life cycle of an apple tree from seed to adult. We were able to complete investigations to find out what plants need to survive and discovered lots of new vocabulary.

We enjoyed History week when we thought about sailing down the Nile and the places and things we would like to do. We explored Tutankhamun's tomb and found out how to make a mummy!

In PE we have been exploring ball skills. We practised lots of different throws and catches. These helped us

to improve and meant we could have a competitive game of football rounders towards the end of the term.

We have worked really hard in Y3 and we are ready for the challenge of Y4!
