

Year 3 Spring 2 2022

In Science, we have been investigating different rocks. We identified a range of metamorphic, sedimentary and igneous rocks and discovered how they were created.

In Maths, we have had a focus on measures: time, money, length, mass and capacity. We have explored statistics – creating tally charts, pictograms and thinking about bar charts. We have begun to develop column methods for addition and subtraction.

In English we enjoyed writing about The Twits and making up information about the Roly Poly bird. As well as creating our own what happens next. We have written poems - calligrams and shape poems as well as stretching our imagination and looking inside a marble!

In History, we have been finding out about Ancient Egypt. We looked at life as an Egyptian pyramid builder and features of the era.

During DT, we have been learning all about boxes and how to keep eggs safe. We have found out lots about Cadbury's Crème Eggs and we designed our own boxes to hold an Easter Story Egg. We had to use lots of different skills such as measuring, cutting, drawing etc.

Coming up in Summer 1

- Persuasive writing
- Number and shape/lines/perimeter
- Geography connected to the Mediterranean
- Plants
- Hinduism
- Magnets
