

YEAR TWO SPRING 2 2025

This half term has been very busy, but lots of fun! In English we looked at the type of language advertisers use to persuade us to buy things, and we even wrote a persuasive advert ourselves. After that, we used the story “Alfie’s Star” to help us to understand the structure of a 4-part story. We acted out the story first, then we created our own versions, using time connectives to help our story flow. Finally, we learned about performance poetry, using the poem “The Sound Collector” by Roger McGough. We’re sure that your child would love to perform it for you!

In maths, we have been doing lots of work on adding subtracting 2 digit numbers, using equipment to help us when numbers needed to be exchanged.

In March, we were visited by Mrs Chippendale from the Openzone, who taught us how to create simple programs using ScratchJr, focusing on sequencing and events which related to storytelling and literacy. We have also been creating pictograms online using information we have gathered in class. Check out the website on our Google Classroom.

In Science we have been learning all about food chains. We learnt the meaning of the words 'producer' and 'consumer' and how energy is passed from plants to other living things. We kept an eye on our worm farms and noticed that they have mixed up all of the layers of sand and dirt!

Finally, we completed our Sponsored walk in the last week of term. This was lots of fun and very tiring but it was all for a good cause!
