

## **Year 3 Spring 2 2025**

### **English**

We have enjoyed a lovely half term and worked incredibly hard during our English lessons! We have enjoyed using a book called 'Arthur and the Golden Rope' which is a myth story based on Norse mythology. The children enjoyed meeting Arthur the unlikeliest of heroes and creating their own unlikely hero and mythological creatures that they faced on their own quest!

### **Maths**

In Maths we have recapped our 8x table facts and finding halves of numbers. We have also looked at how to find and compare the mass and capacity of different objects and containers! The children have also practised using some tricky vocabulary around shapes including parallel and perpendicular lines! The children ended the half term looking at statistics and collecting data using tally charts.

### **Science**

The children have enjoyed their science topic this half term based on the human body. They enjoyed learning about how to keep the body healthy and also how the food we eat travels through the body. The children have also enjoyed learning about how the different bones in the body connect together and their technical names! The children also loved exploring adaptations during science week and discovering why different animals look and do the things they do!

### **Art**

In art we have designed and created our own papyrus paper based on the ancient Egyptians! The children were very good at copying and adapting some Egyptian symbols to tell a story on a piece of their very own papyrus paper.

### **History**

This half term has been all about the ancient Egyptians! The children loved exploring the different artefacts and pretending to work out their uses just like a real archaeologist! The children also loved learning about how the pyramids were built and what they were used for.
