

Rainbow group have been following the topic area about under the sea. They have enjoyed a sensory story each morning and have participated in follow up activities such as sand and water play, swimming, music and painting to create a giant rainbow fish for display in the classroom.

We have been kindly donated a fish tank for the classroom by Catherine's parents, and Matt from MD Aquatics in Jarrow has been extremely generous and has donated all the fish, ornaments, and accessories. He was so kind as to come into school for the afternoon and has set up the tank ready for all of the pupils to enjoy.
