

# Blue 2 Spring Term 2016

The themes in **science** this term have been Earth and Beyond and Forces and Motion. The class have participated in a range of practical activities that have enabled them to learn about the world in a fun way!

In **art** pupils have been focusing on POP ART and Andy Warhol. This has been accessed through photography, colouring in with pencils and paint. The class also shared their fantastic work with others during a KS3/4 assembly.

In **numeracy** pupils have been focusing on number since January. This has included art, songs, recognition, counting, sequencing addition, subtraction, facts, sequencing and money. Pupils have also been able to link this to real life situations when purchasing items from the school tuck shop and café as well as when setting places and serving during snack and lunch times!

Some pupils in BLUE 2 performed in the school **talent show** in the form of break dancing and singing/ signing. The girls did a fantastic job and we are all very proud of them!
