

Keelman's Way School

Supporting pupils with medical conditions policy

This policy is written in line with the requirements of:-

Children and Families Act 2014 - section 100

Supporting pupils at school with medical conditions: statutory guidance for governing bodies of maintained schools and proprietors of academies in England, DfE Sept 2014

0-25 SEND Code of Practice, DfE 2014

Mental Health and behaviour in schools: departmental advice for school staff, DfE June 2014

Equalities Act 2010

Schools Admissions Code, DfE 1 Feb 2010

This policy should be read in conjunction with the other school policies in particular SEN Policy / SEN Information Report, Safeguarding Policy, Off-site visits policy, Complaints Policy etc

This policy was developed with the involvement of Health commissioning, parents, school staff and governors and will be reviewed annually.

Definitions of medical Conditions

Pupils' medical needs may be broadly summarised as being of two types:-

Short-term affecting their participation at school because they are on a course of medication.

Long-term potentially limiting access to education and requiring on-going support, medicines or care while at school to help them to manage their condition and keep them well, including monitoring and intervention in emergency circumstances. It is important that parents feel confident that the school will provide effective support for their child's medical condition and that pupils feel safe.

Some children with medical conditions may be considered disabled. Where this is the case governing bodies **must** comply with their duties under the Equality Act 2010. Some may also have special educational needs (SEN) and may have a statement or Education, Health and Care Plan (EHCP). Where this is the case this policy should be read in conjunction with the 0-25 SEND Code of Practice and the school's SEN policy / SEN Information Report/Individual Personal plans are part of the EHCP process.

The statutory duty of the governing body

The governing body remains legally responsible and accountable for fulfilling their statutory duty for supporting pupils at school with medical conditions. The governing body of Keelman's Way School fulfil this by:-

- Ensuring that arrangements are in place to support pupils with medical conditions. In doing so we will ensure that such children can access and enjoy the same opportunities at school as any other child;
- Taking into account that many medical conditions that require support at school will affect quality of life and may be life-threatening. Some will be more obvious than others and therefore the focus is on the needs of each individual child and how their medical condition impacts on their school life;
- Ensuring that the arrangements give parents and pupils confidence in the school's ability to provide effective support for medical conditions, should show an understanding of how medical conditions impact on a child's ability to learn, as well as increase their confidence and promote self-care. We will ensure that staff are properly trained to provide the support that pupils need;
- Ensuring that no child with a medical condition is denied admission, or prevented from taking up a place in school because arrangements for their medical condition have not been made. However, in line with safeguarding duties, we will ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases and reserve the right to refuse admittance to a child at times where it would be detrimental to the health of that child or others to do so; ie emergency medication.
- Ensuring that the arrangements put in place are sufficient to meet our statutory duties and ensure that policies, plans, procedures and systems are properly and effectively implemented;
- Developing a policy for supporting pupils with medical conditions that is reviewed regularly and accessible to parents and school staff (this policy);
- Ensuring that the policy includes details on how the policy will be implemented effectively, including a named person who has overall responsibility for policy implementation (see section below on policy implementation);
- Ensuring that the policy sets out the procedures to be followed whenever the school is notified that a pupil has a medical condition (see section below on procedure to be followed when notifications is received that a pupil has a medical condition);
- Ensuring that the policy covers the role of individual healthcare plans, and who is responsible for their development, in supporting pupils at school with medical conditions (see section below on individual healthcare plans);

- Ensuring that the school policy clearly identifies the roles and responsibilities of all those involved in arrangements for supporting pupils at school with medical conditions and how they will be supported, how their training needs will be assessed and how and by whom training will be commissioned and provided (see section below on staff training and support);
- Ensuring that the school policy covers arrangements for children who are competent to manage their own health needs and medicines (see section below on the child's role in managing their own medical needs);
- Ensuring that the policy is clear about the procedures to be followed for managing medicines including the completion of written records (see section below on managing medicines on school premises);
- Ensuring that the policy sets out what should happen in an emergency situation (see section below on emergency procedures);
- Ensuring that the arrangements are clear and unambiguous about the need to support actively pupils with medical conditions to participate in school trips and visits, or in sporting activities and not prevent them from doing so (see section on day trips, residential trips and sporting activities);
- Considering whether to
 - develop transport healthcare plans in conjunction with the LA for pupils with life-threatening conditions who use home- to- school transport
 - Purchase and train staff in the use of defibrillators
 - Once regulations are changed consider holding asthma inhalers for emergency use;
- Ensuring that the policy is explicit about what practice is not acceptable (see section on unacceptable practice);
- Ensuring that the appropriate level of insurance is in place and appropriate to the level of risk (see section on Liability and Indemnity);
- Ensuring that the policy sets out how complaints may be made and will be handled concerning the support to pupils with medical conditions (see section on complaints).

Policy implementation

The statutory duty for making arrangements for supporting pupils at school with medical conditions rests with the governing Body. The governing body have conferred the following functions of the implementation of this policy to the staff below, however the governing body remains legally responsible and accountable for fulfilling our statutory duty.

The overall responsibility for the implementation of this policy is given to Paula Selby Head Teacher. She will also be responsible for ensuring that sufficient staff are suitably trained and will ensure cover arrangements in cases of staff absences or staff turnover to ensure that someone is always available and on-site with an appropriate level of training.

Inclusion and Medical officer, Vicci Gillmartin who will be responsible in conjunction with parents/carers, for drawing up, implementing and keeping under review the individual healthcare plan for each pupil and making sure relevant staff are aware of these plans, (JD attached).

All members of staff are expected to show a commitment and awareness of children's medical conditions and the expectations of this policy. All new members of staff will be inducted into the arrangements and guidelines in this policy upon taking up their post.

Procedure to be followed when notification is received that a pupil has a medical condition

This covers notification prior to admission, procedures to cover transitional arrangements between schools or alternative providers and the process to be followed upon reintegration after a period of absence or when pupils' needs change. For children being admitted to Keelman's Way School for the first time with good notification given, the arrangements will be in place for the start of the relevant school term. In other cases, such as a new diagnosis or a child moving to Keelman's Way School mid-term, we will make every effort to ensure that arrangements are put in place within two weeks.

In making the arrangements, we will take into account that many of the medical conditions that require support at school will affect quality of life and may be life-threatening. We also acknowledge that some may be more obvious than others. We will therefore ensure that the focus is on the needs of each individual child and how their medical condition impacts on their school life. We aim to ensure that parents/carers and pupils can have confidence in our ability to provide effective support for medical conditions in school, so the arrangements will show an understanding of how medical conditions impact on the child's ability to learn, as well as increase their confidence and promote self-care.

We will ensure that staff are properly trained and supervised to support pupils' medical conditions and will be clear and unambiguous about the need to support actively pupils with medical conditions to participate in school trips and visits, or in sporting activities and not prevent them in doing so. We will make arrangements for the inclusion of pupils in such activities with any adjustments as required unless evidence from a clinician such as a GP states that this is not possible. We will make sure that no child with a medical condition is denied admission or prevented from attending the school because arrangements for supporting their medical condition have not been made. However, in line with our safeguarding duties, we will ensure that all pupils' health is not put at unnecessary risk from, for example infectious disease. We will therefore not accept a child in school at times where it would be detrimental to the health of that child or others.

Keelman's Way School does not have to wait for a formal diagnosis before providing support to pupils. In cases where a pupil's medical condition is unclear, or where there is a difference of opinion, judgements will be needed about what support to provide based on available evidence. This would normally involve some form of medical evidence and consultation with parents/carers. Where evidence conflicts some degree of challenge may be necessary to ensure that the right support can be put in place. These discussions will be led by Coordinator for Inclusion and medical needs and following these discussions an individual healthcare plan will be written in conjunction with the parent/carers, and be put in place.

Individual healthcare plans

Individual healthcare plans will help to ensure that Keelman's Way School effectively supports pupils with medical conditions. They will provide clarity about what needs to be done, when and by whom. They will often be essential, such as in cases where conditions fluctuate or where there is a high risk that emergency intervention will be needed. They are likely to be helpful in the majority of other cases too, especially where medical conditions are long-term and complex. However, not all children will require one. The school, healthcare professional and parent/carer should agree, based on evidence, when a healthcare plan would be inappropriate or disproportionate. If consensus cannot be reached the Headteacher is best placed to take a final view. A flow chart for identifying and agreeing the support a child needs and developing an individual healthcare plan is provided at annex A.

Individual healthcare plans will be easily accessible to all who need to refer to them, while preserving confidentiality. Plans will capture the key information and actions that are required to support the child effectively. The level of detail within the plan will depend on the complexity of the child's condition and the degree of support needed. This is important because different children with the same health condition may require very different support. Where a child has SEN but does not have a statement of EHC plan, their special educational needs should be mentioned in their individual healthcare plan.

Individual healthcare plans (and their review) should be drawn up in partnership between the school, parents/carers and a relevant healthcare professional eg school, specialist or children's community nurse, who can best advise on the particular needs of the child. Pupils should also be involved whenever appropriate. The aim should be to capture the steps which Keelman's Way School should take to help manage their condition and overcome any potential barriers to getting the most from their education. Partners should agree who will take the lead in writing the plan, but responsibility for ensuring it is finalised and implemented rests with the school.

Keelman's Way School will ensure that individual healthcare plans are reviewed at least annually or earlier if evidence is presented that the child's needs have changed. They will be developed and reviewed with the child's best interests in mind and ensure that Keelman's Way School assesses and manages risks to the child's education, health and social wellbeing and minimises disruption. Where a child is returning to school following a period of hospital education or alternative provision, we will work with the local authority and education provider to ensure that the

individual healthcare plan identifies the support the child will need to reintegrate effectively.

The policy on administration of medication provides additional details on how these will be managed.

Roles and responsibilities

Please refer to the section on policy implementation for the functions that have been delegated to different, named members of staff at Keelman's Way

In addition we can refer to the **Community Nursing Team** for support with drawing up Individual Healthcare Plans, provide or commission specialist medical training, liaison with lead clinicians and advice or support in relation to pupils with medical conditions.

Other **healthcare professionals, including GPs and paediatricians** should notify the Community Nursing Team when a child has been identified as having a medical condition that will require support at school. Specialist local health teams may be able to provide support, and training to staff, for children with particular conditions (eg asthma, diabetes, epilepsy)

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. They should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan. Other pupils will often be sensitive to the needs of those with medical conditions, and can, for example, alert staff to the deteriorating condition or emergency need of pupils with medical conditions.

Parents/carers should provide the school with sufficient and up-to-date information about their child's medical needs. They may in some cases be the first to notify the school that their child has a medical condition. Parents are key partners and should be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. They should carry out any action they have agreed to as part of its implementation, eg provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

Local authorities are commissioners of school nurses for maintained schools and academies in Kent. Under Section 10 of the Children Act 2004, they have a duty to promote co-operation between relevant partners such as governing bodies of maintained schools, proprietors of academies, clinical commissioning groups and NHS England, with a view to improving the well-being of children with regard to their physical and mental health, and their education, training and recreation. KCC is currently consulting on the re-organisation of its Health Needs provision which will strengthen its ability to provide support, advice and guidance, including suitable training for school staff, to ensure that the support specified within individual healthcare plans can be delivered effectively. KCC will work with us to support pupils with medical conditions to attend full time. Where pupils would not receive a suitable education in a mainstream school because of their health needs, the local

authority has a duty to make other arrangements. Statutory guidance for local authorities sets out that they should be ready to make arrangements under this duty when it is clear that a child will be away from school for 15 days or more because of health needs (whether consecutive or cumulative across the year) education for children with health needs who cannot attend school

Providers of health services should co-operate with schools that are supporting children with medical conditions. They can provide valuable support, information, advice and guidance to schools, and their staff, to support children with medical conditions at school.

Clinical commissioning groups (CCGs) commission other healthcare professionals such as specialist nurses. They have a reciprocal duty to co-operate under Section 10 of the Children Act 2004 (as described above for local authorities). The local Health and Well-being Board provides a forum for the local authority and CCGs to consider with other partners, including locally elected representatives, how to strengthen links between education, health and care settings.

The **Ofsted** inspection framework places a clear emphasis on meeting the needs of disabled children and pupils with SEN, and considering the quality of teaching and the progress made by these pupils. Inspectors are already briefed to consider the needs of pupils with chronic or long-term medical conditions alongside these groups and to report on how well their needs are being met. Schools are expected to have a policy dealing with medical needs and to be able to demonstrate that it is being implemented effectively.

Staff training and support

All staff are aware of the school emergency response procedures and these are displayed in each teaching area. We maintain a register of staff with first aid training and other relevant training including the administration of medications.

All staff who are required to provide support to pupils for medical conditions will be trained by healthcare professional qualified to do so. The training need will be identified by the healthcare professional during the development or review of the individual healthcare plan. Competency in specific areas of support will be signed off and records kept in school by CCN staff.

Training should be sufficient to ensure that staff are competent and have confidence in their ability to support pupils with medical conditions, and to fulfil the requirements set out in the individual healthcare plans. They will need an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures.

Staff must not give prescription medicines or undertake healthcare procedures without appropriate training (updated to reflect any individual healthcare plans). A first aid certificate does not constitute appropriate training in supporting children with medical conditions. Healthcare professionals, including the school nurse, can provide confirmation of proficiency of staff in a medical procedure, or in providing medication.

All staff will receive induction training and regular whole school awareness training so that all staff are aware of the school's policy for supporting pupils with medical conditions and their role in implementing the policy. Headteacher will seek advice from relevant healthcare professions about training needs, including preventative and emergency measures so that staff can recognise and act quickly when a problem occurs.

The family of a child will often be key in providing relevant information to school staff about how their child's needs can be met, and parents will be asked for their views. They should provide specific advice, but should not be the sole trainer.

The child's role in managing their own medical needs

If, after discussion with the parent/carer, it is agreed that the child is competent to manage his/her own medication and procedures, s/he will be encouraged to do so. This will be reflected in the individual healthcare plan.

Wherever possible children will be allowed to carry their own medicines and relevant devices or should be able to access their medication for self-medication quickly and easily; these will be stored in the cupboard in name which room to ensure that the safeguarding of other children is not compromised. Keelman's Way School does also recognise that children who take their medicines themselves and/or manage procedures may require an appropriate level of supervision. If it is not appropriate for a child to self-manage, then relevant staff will help to administer medicines and manage procedures for them.

If a child refuses to take medicine or carry out a necessary procedure, staff should not force them to do so, but follow the procedure agreed in the individual healthcare plan. Parents will be informed so that alternative options can be considered.

Managing medicines on school premises and record keeping

At Keelman's Way School has a detailed policy on managing medication and correct information is provided for navigation systems.

Day trips, residential visits, and sporting activities

We will actively support pupils with medical condition to participate in day trips, residential visits and sporting activities by being flexible and making reasonable adjustments unless there is evidence from a clinician such as a GP that this is not possible.

We will always conduct a risk assessment so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions can be included safely. This will involve consultation with parents\carers and relevant healthcare professions and will be informed by Health and Safety Executive (HSE) guidance on school trips.

Other issues for consideration

Where a pupil uses home-to-school transport arranged by the LA and they also have a medical condition which is life-threatening, we will share the pupil's individual healthcare plan with the local authority.

Unacceptable practice

Although staff at Keelman's Way School should use their discretion and judge each case on its merit with reference to the child's individual healthcare plan, it is not generally acceptable practice to:

- Prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- Assume that every child with the same condition requires the same treatment;
- Ignore the views of the child or their parents\carers; or ignore medical evidence or opinion (although this may be challenged);
- Send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- If the child becomes ill, send them to the school office or medical room unaccompanied or with someone suitable;
- Penalise children for their attendance record if their absences are related to their medical condition, eg hospital appointments;
- Prevent pupils from drinking, eating or taking toilet breaks whenever they need to in order to manage their medical condition effectively;
- Require parents\carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs; or
- Prevent children from participating, or creating unnecessary barriers to children participating in any aspect of school life, including school trips, eg by requiring parents to accompany the child.

Liability and indemnity

School is covered by its policy with South Tyneside Council.

Complaints

Should parents\carers be unhappy with any aspect of their child's care at, they must discuss their concerns with the school. This will be with the child's Coordinator for Inclusion and medication needs. If this does not resolve the problem or allay the concern, the problem should be brought to a member of leadership team, who will, where necessary, bring concerns to the attention of the Headteacher. In the unlikely event of this not resolving the issue, the parent\carer must make a formal complaint using the Keelman's Way School Complaints Procedure.
