

bike pump - pulls air in + pushes out

Strengthening that third finger

Using a table

Place your hand palm downwards on a table. Keep your hand flat, and move fingers 2 and 3 up and down together. Now move your third finger up and down on its own, keeping the other fingers still on the table. This is quite difficult - do it slowly at first.

Using false fingering

Use the false fingering shown, i.e. play E by pressing 3rd valve instead of $\frac{1}{2}$ to exercise your third finger.

When you can play this, play each bar backwards.
