

Week beginning 6<sup>th</sup> February 2017.

## More magical times!

We have continued to think about 'The Magic Porridge Pot'. The children have been practising joining in with the story and using actions to help them re-tell it.

They have made a graph of who liked porridge and who didn't!

We have continued to practise our counting and number formation, which is really improving.

The children have also become Scientists and been part of an experiment mixing bicarbonate of soda and vinegar! It spread just like magic porridge!
