

Maths is Fun!
F2 2018
*Parents, come and
join in!*

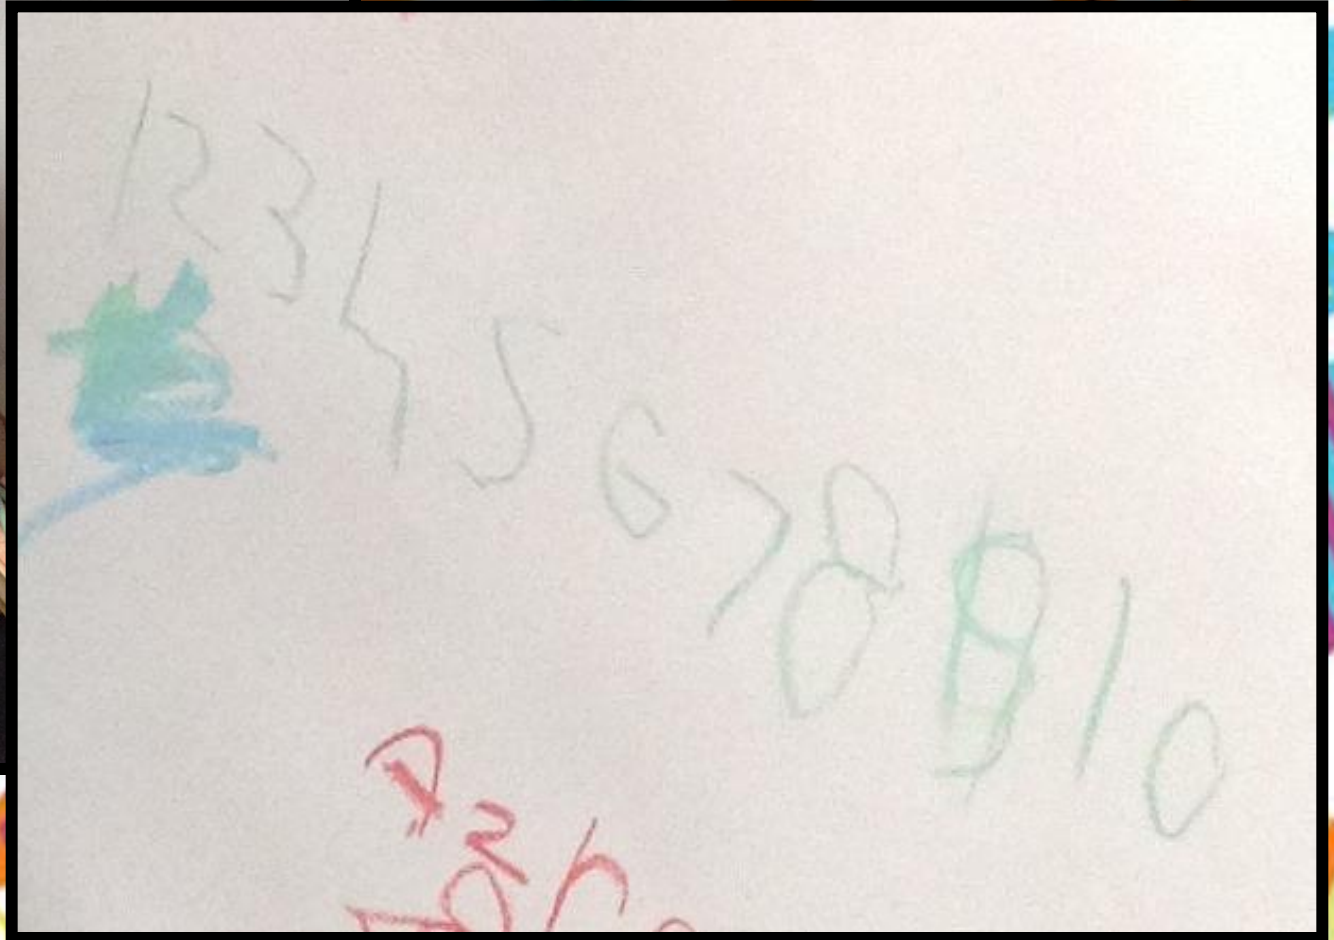

Maths in Art? What shape is Evie painting? Can you see her 3 bears? What sizes are they?

Great Numicon work from Noah and his dad. Keep counting!

Great numeral
writing Azra.
Well done!

How many
paperclips
have you
got on your
magnet
Max?
What if you
had one
more?

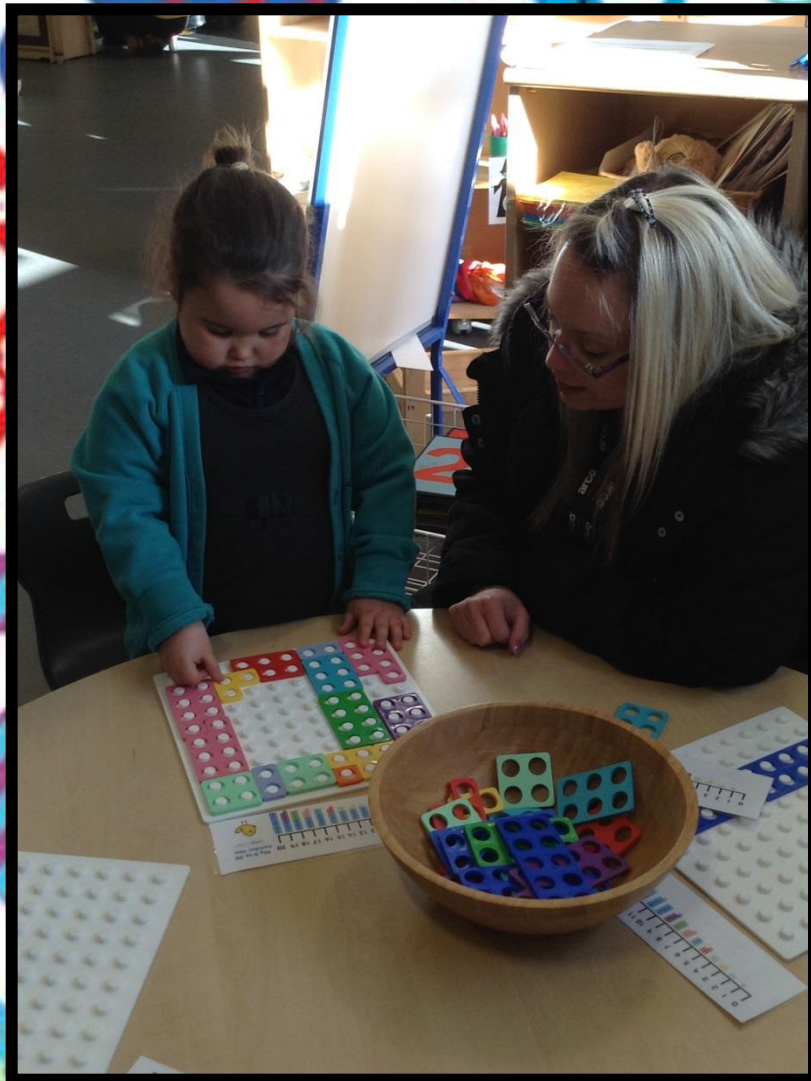

More great numeral writing from Elissa with her dad's support. Well done!

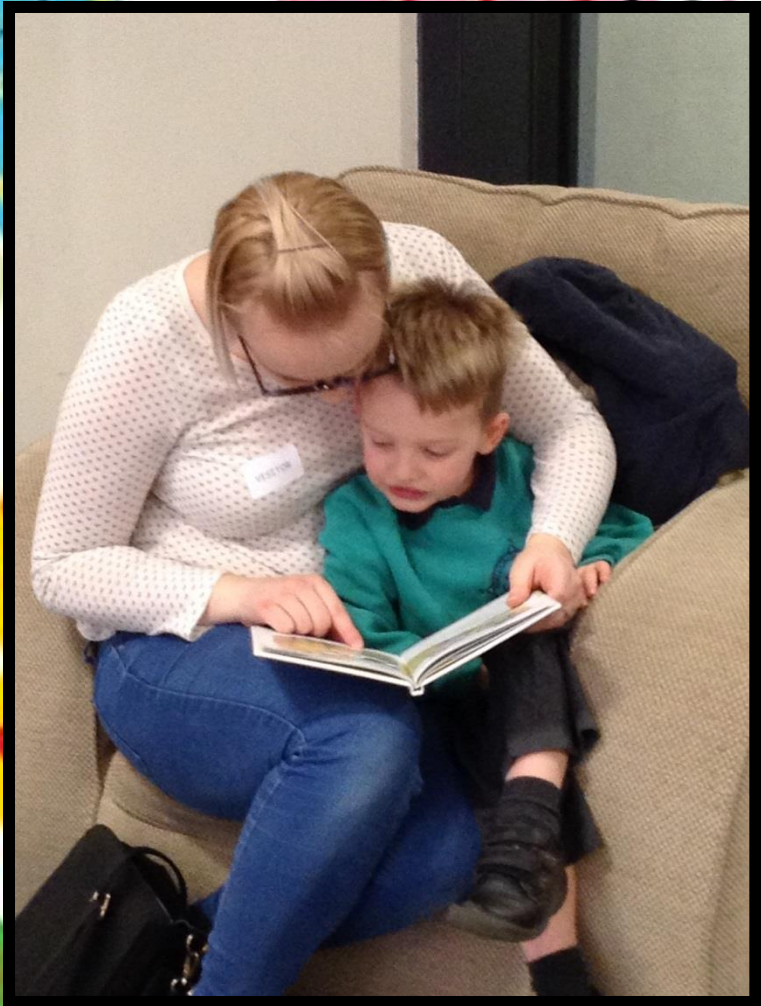

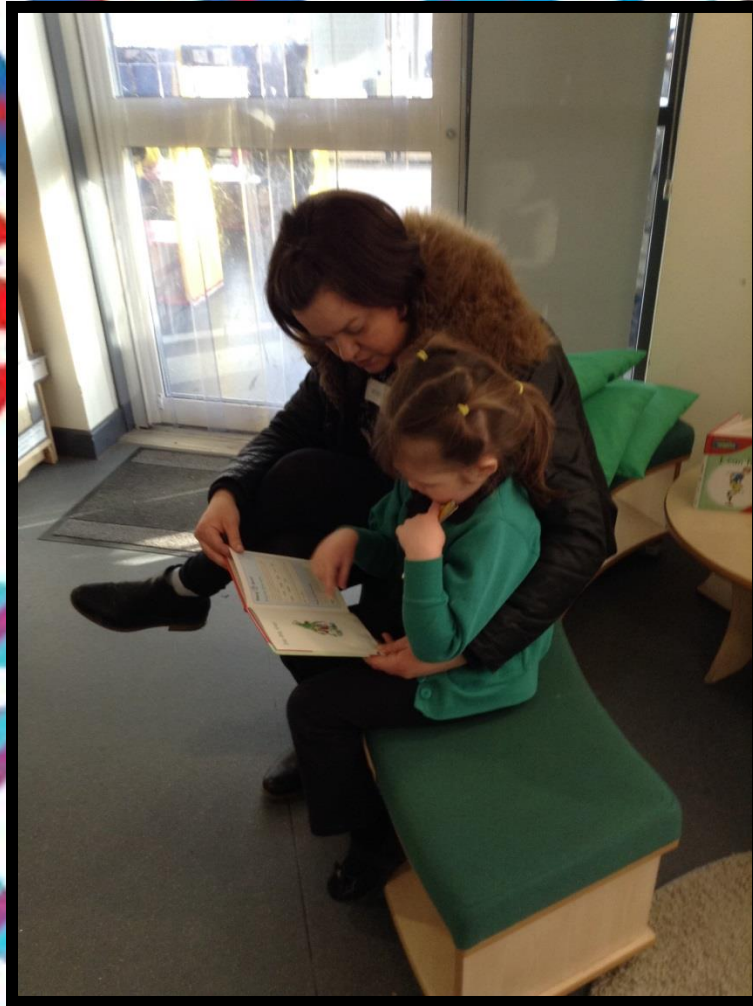

More great work from Elissa and her dad. Just a shame that the cookies they were counting weren't real! How many Smarties can you count on top of each one?

Did you know that lots of our Traditional Tales have Maths in them? The 3 Little Pigs, the clock struck 12 o'clock in Cinderella, the small, medium and large bowls of porridge in Goldilocks.

Our Fairy Tale Kingdom offered a quiet place to work together.

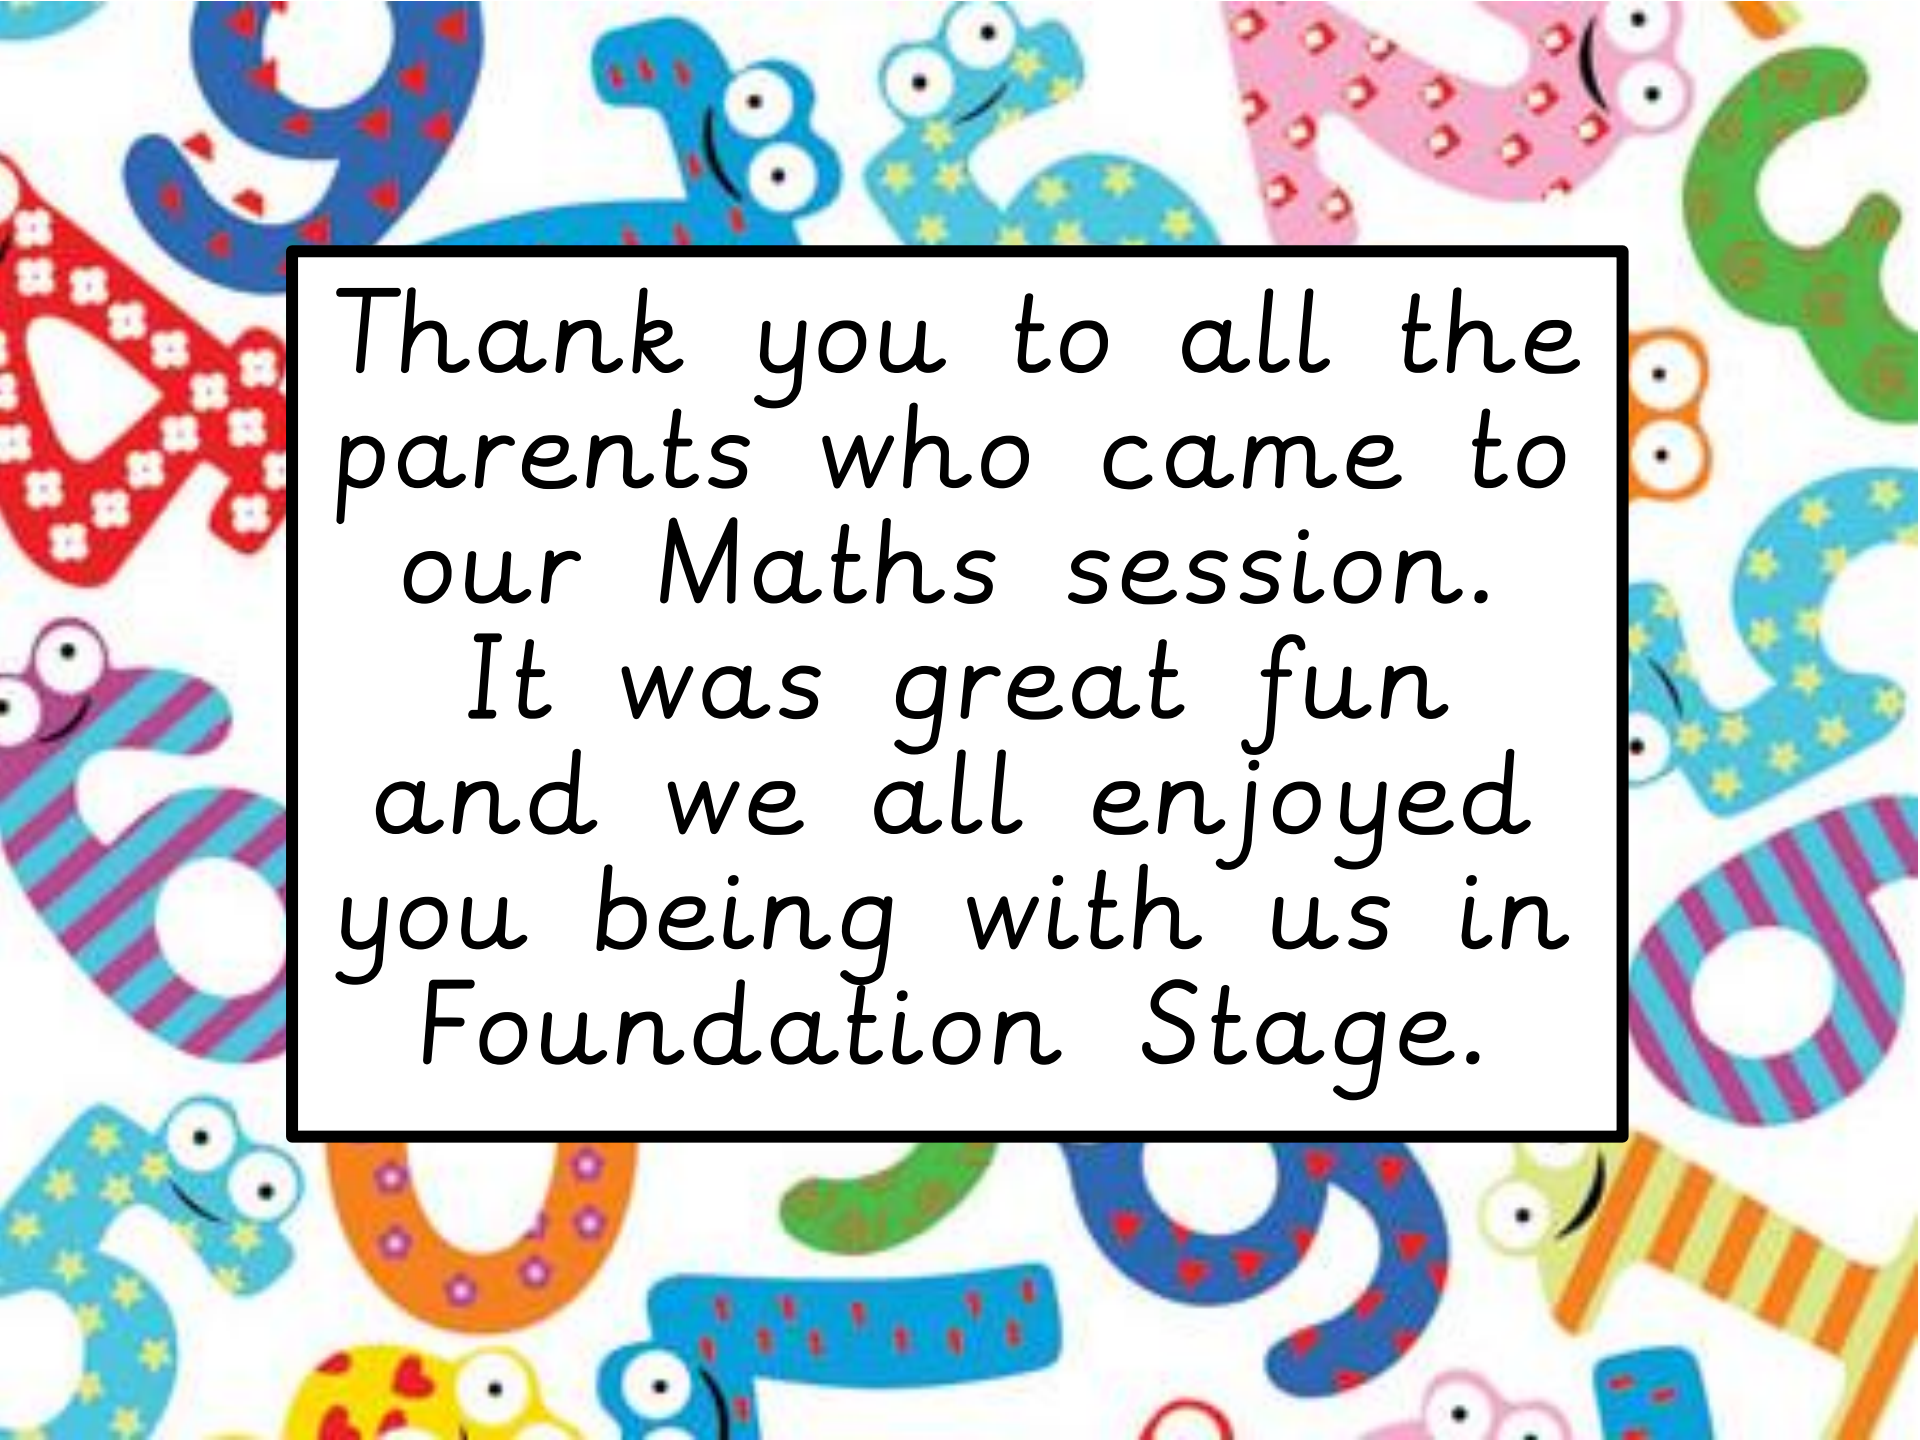

Yasmin
looked at
the numbers
on her
jigsaw
carefully.
She sorted
out the size
of all of the
people and
put them in
order.

Darcy and her mum got tricky with the Transient Art. Darcy worked out what one more, and then one less, than the number of sticks mum had. Brilliant mental maths Darcy!

The Funky-Fingers table provided some serious counting for Jesse and Azra. I wonder how many pasta tubes they managed to thread onto their strings. Whose was the longest?

Thank you to all the
parents who came to
our Maths session.
It was great fun
and we all enjoyed
you being with us in
Foundation Stage.
