

Week beginning 15th October 2018.

Autumn Days.

Another great week in Foundation Stage. We have recapped on our Autumn Walk last week, having a go at drawing and labelling everything that we saw. We have also decided to see if we can grow our own conker tree! After working out that a conker is a seed, we are soaking a few in water to see if anything happens. Nothing has yet though!

The children have also all been working on creating their own Autumn tree paintings, which you will start to see decorating the unit. They look beautiful.

We have been working hard on learning about the mathematical names and characteristics of 2D shapes, which we will continue to do next week.
