

*FS Let's get
Building!*

*Made in Hull;
Houses and Homes*

Spring '19

Our builders were keen to get going straightaway. They'd all come to school ready for a day of hard work!

Our joiners were ready at their work bench.

Let the building work commence! The boys worked brilliantly as a team. Well done everyone!

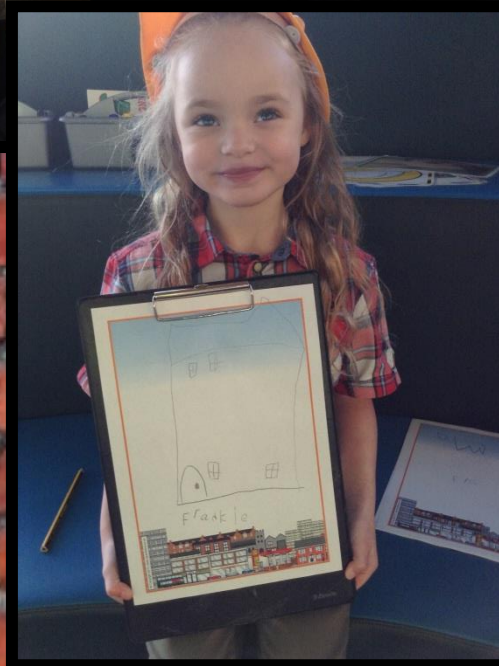

There was a problem with the wall though, it kept wobbling over. So we looked at how the walls in the Winter Garden were built and compared the two. Simon had a go at copying the pattern.

The architects then came along to get on with a bit of housing design. Great work girls. Let's have a go at building them!

These builders also looked at the pattern of the brickwork at school. Amazing work girls, your wall is so strong!

Such a super morning exploring our building site. A great start to our new topic by everyone at school today, we loved it.

What shall we do next?
