

Week beginning 14th October

This week in FSI...

We have had a shape focus in Maths this week. We have been looking at squares, triangles, circles and rectangles. We have asked the children to look out for these shapes on the way home from school. Have they managed to spot any?

In phonics, we have had to use our ears to listen hard to our 'noisy neighbours.' We have been listening to household noises and have had to try to identify what the noises are.

In our 'dough disco' this week, we have introduced the 'dough.' After our hand warm up, we have been practicing how to make a ball and a pancake with our dough. The children are really developing their fine motor skills through this programme.

We hope you have a lovely weekend.
