

$$2 + 3 = 5$$

Exploring addition

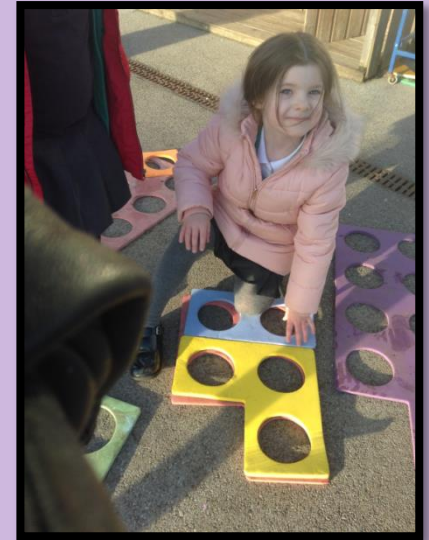

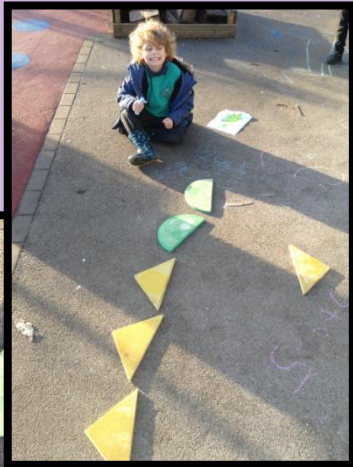

This week in maths, we've been exploring lots of different ways of adding.

Evelyn used the shapes to help her write an addition sentence.

Myla used the numicon.

"8 add 1 equals 9"

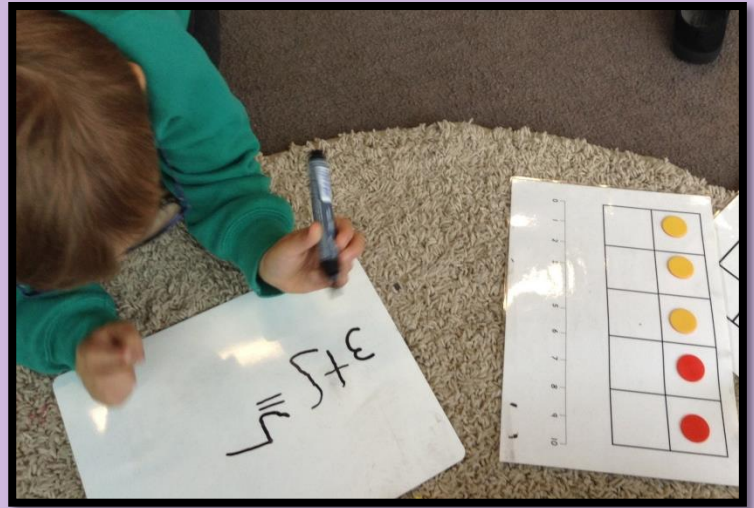

Enes made these number sentences in the garden. He used the shapes to help him with his addition.

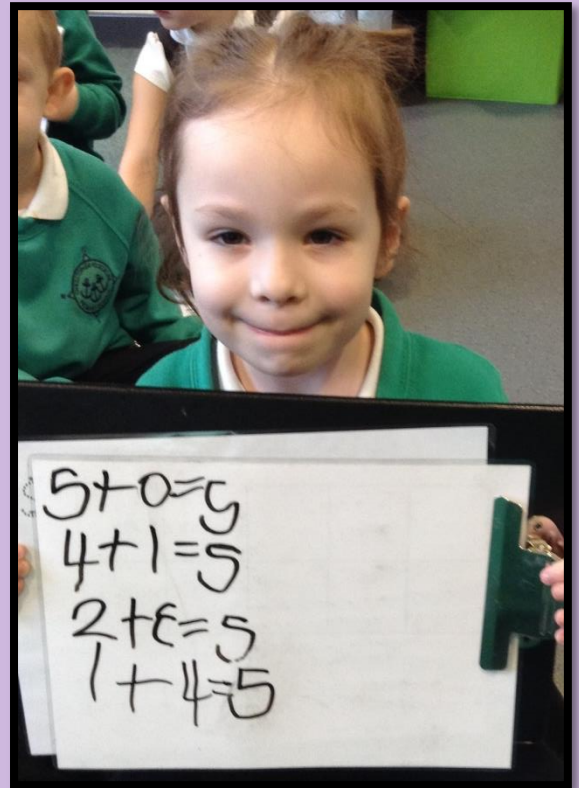

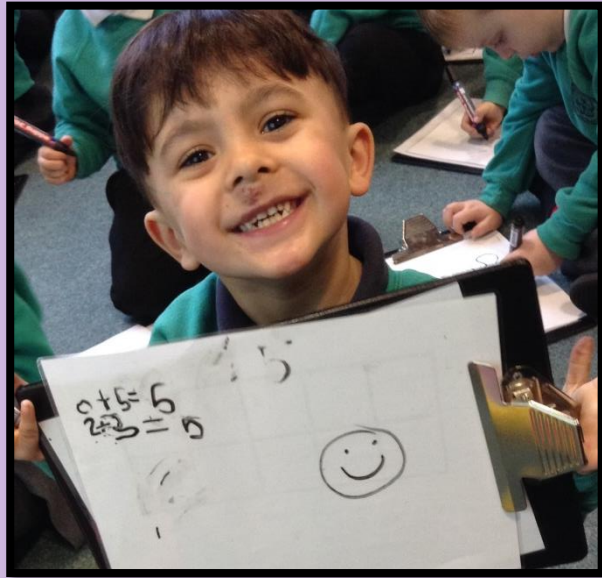

The children have been using the 10's grid to help them with different ways of finding 5. We then wrote an addition sentence.

Some amazing work on addition. The children could talk about what they have written.

Number Blocks Hide & Seek

Number Blocks Hide & Seek is a great app for practising addition up to 10.

Why not download it at home, it's great fun.
