How to make a Fathers Day card.

You will need…

coloured card
pencil
scissors
black pen
glue or tape
decorations

1. Place your hand on to the coloured card. Draw around your hand using the pencil. Carefully cut it out. Do this twice.

2. Cut a long strip of card and fold it into 12 equal parts VVVVVV to create a zig-zag.

3. Laying the zig-zag flat, leave the first square empty. In the next four squares write 't', 'h', 'i' and 's'. Leave two empty squares. In the next four squares write 'm', 'u', 'c' and 'h'. Your strip should then say, 'this much'.

4. Place the two hand shapes in front of you with the thumbs turning inwards. On the left hand write, 'I love you'. On the right hand write, 'from' and your name.

5. Using glue or tape fix the first square of the zig-zag message to the back of the left hand and the last square to the back of the right hand.

6. Decorate however you wish.
