Let's buy some ingredients for sandwiches.

Help your child to learn all about using money and adding amounts of money together by following these simple problems.

You could either use real 1p coins, print and cut out the coins below or make your own.
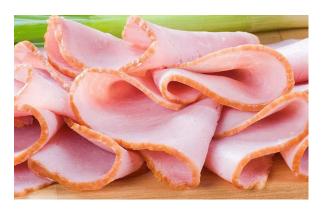

You could make up all sorts of other problems too. Why not have a go at writing out the number sentences too! eg. 5p + 2p = 7p

Once they have got the hang of adding values together, have a go the next activity which is taking away from 10p. Enjoy!
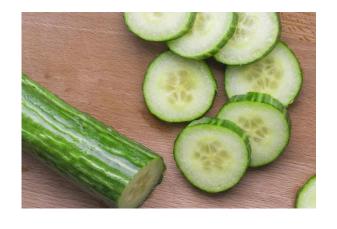

If a ham costs 5p and tomato costs 3p, how much money will you spend? Use the coins to help.

If a lettuce costs 3p and cucumber costs 3p, how much money will you spend? Use the coins to help.

If a bread costs 6p and butter costs 4p, how much money will you spend? Use the coins to help.

If a bread costs 6p and mustard costs 3p, how much money will you spend? Use the coins to help.

If a ham costs 5p and mustard costs 3p, how much money will you spend? Use the coins to help.
