

# At Christopher Pickering Primary School ...

*Be The Best You Can Be!*

## Our Vision and Principles for Science

We develop  
children's  
natural  
curiosity.

At Christopher Pickering we believe  
that science should develop  
children's interest and curiosity in  
the world in which we live.

We take  
part in practical  
and hands on  
activities.

We ask  
questions and make  
independent  
choices.

We use  
scientific vocabulary  
accurately and  
appropriately.

We learn about  
scientists who have  
shaped our  
world.
