

F2 explore
'Houses
and
Homes'.

Foundation Stage was all set up ready for our
'Builder Day'. We had...

...tools...

...bricks...

...giant junk modelling...

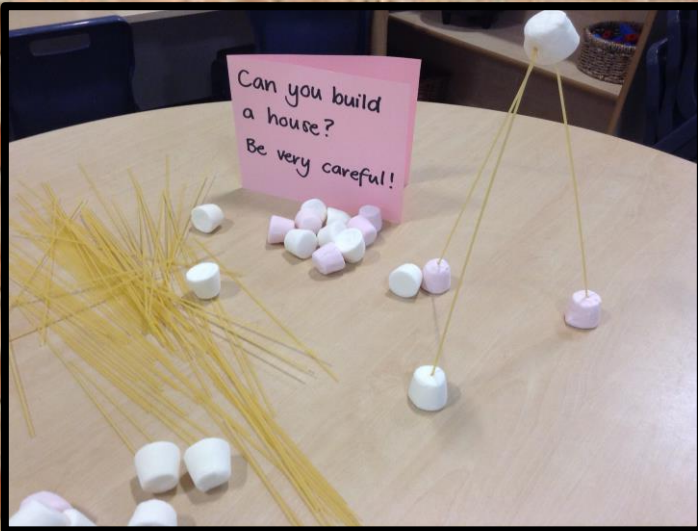

...den building...

...Lego...

...delicate construction...

...natural building materials...

...as well as lots of other building activities.
Then our little builders arrived!

What do builders do?

Build walls.

Alliyah

Build houses.

Isabelle

Dig.

Freddie

Build doors.

Chloe

Build a roof.

Lacie

Build a
swimming baths.

Charlotte W

Everyone soon got busy!

Cody built a block of flats in the transient art area.

Chloe built
flats too.

Ibrahim made
a house.

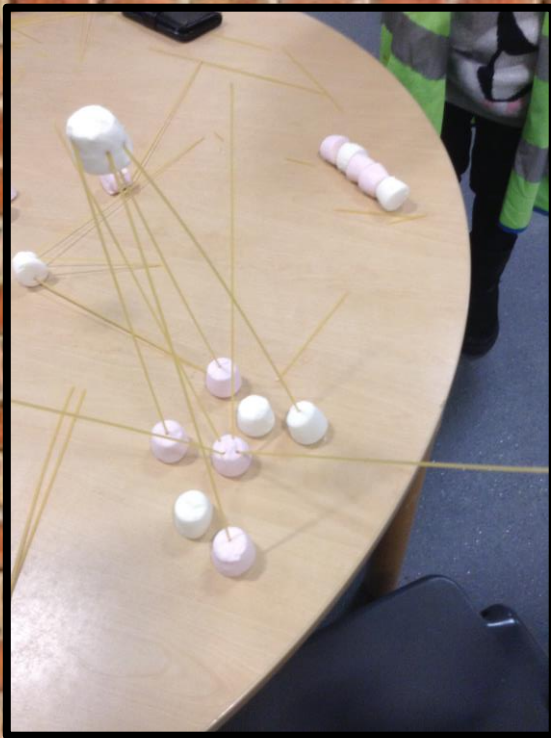

The giant junk modelling was very popular. The tape was tricky but the 'builders' worked very hard.

The children also explored how to use the iPad and take photographs of their creations.

Rory made a brilliant construction out of spaghetti and marshmallows. It was so delicate but he managed to build it without breaking anything! A super photograph too.

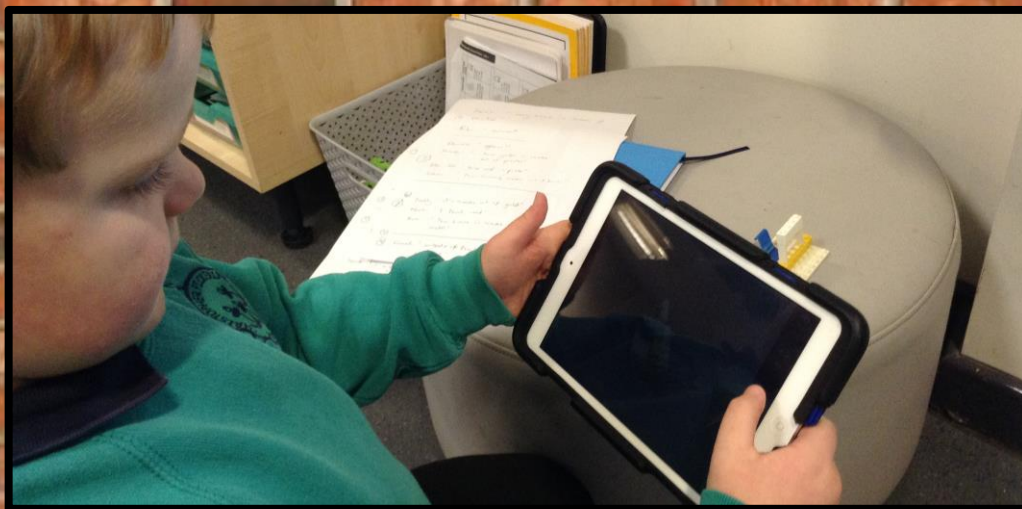

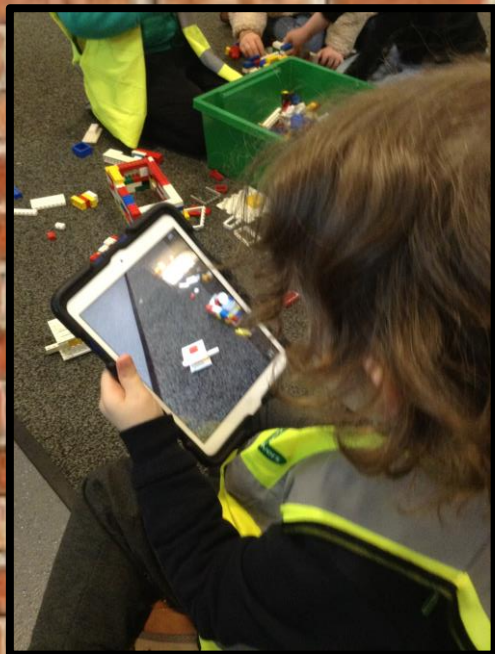

Building with
spaghetti can be
very hazardous!
It's always best to
be cautious.
Safety first at all
times!

Our Lego builders were also very busy creating all sorts of different constructions. There was some great teamwork that went on and they also took photographs of their work.

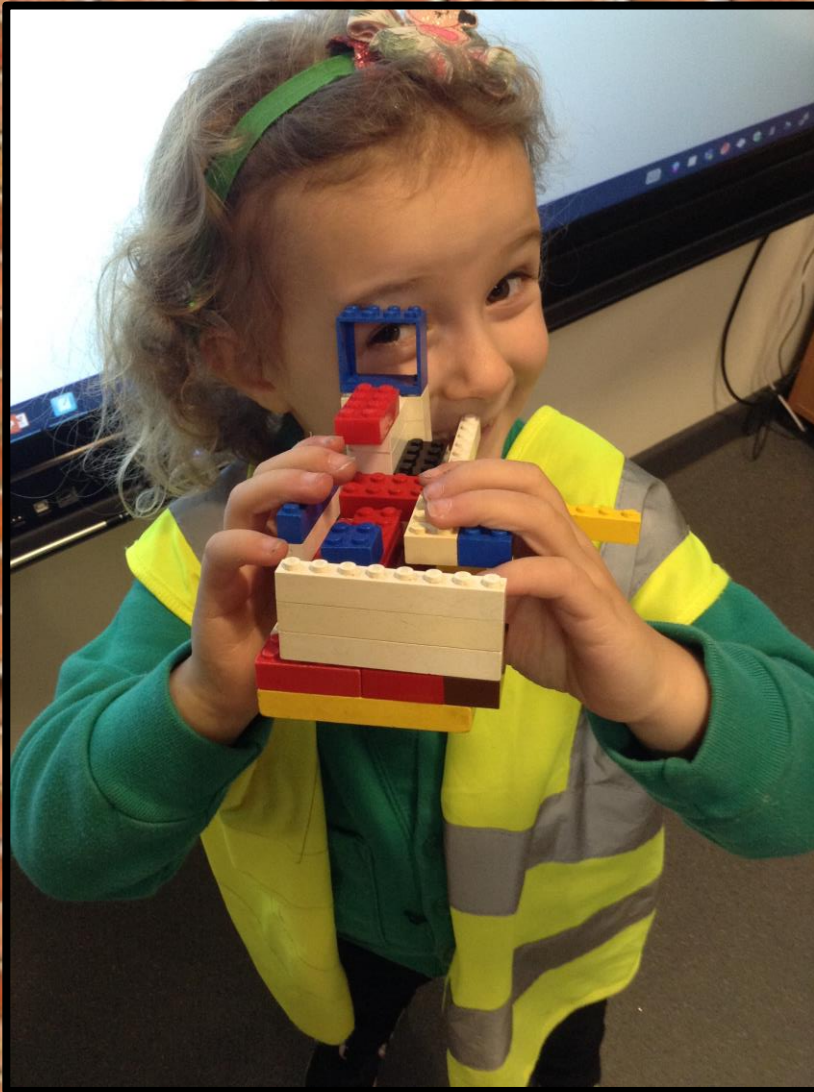

The building
work
continued
outside too.
More great
teamwork
going on,
even if it did
fall down!

Den building was great fun. Some excellent measuring from Rellie and great teamwork all round.

It was a really happy day, full of fun and learning.
