

F2 build their own houses.

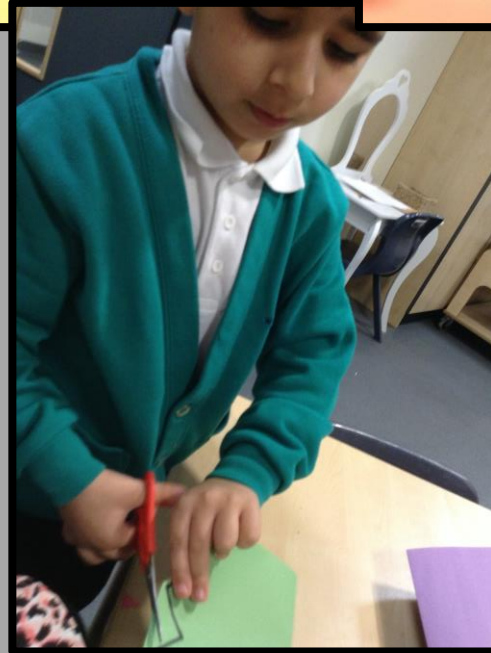

Our DT challenge this term is to make a house using a cereal box. The children have begun making these, working really hard to develop their designing and making techniques. See what you think to their work so far.

Using their box as a template.

Cutting out along the straight lines of their drawn shapes.

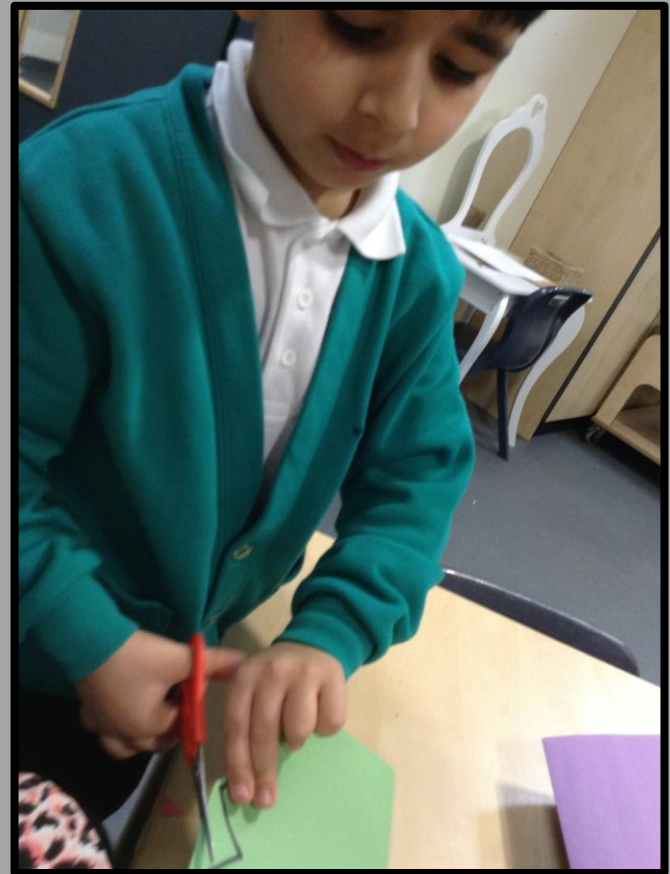

Gluing everything
in place carefully.

Making folds.

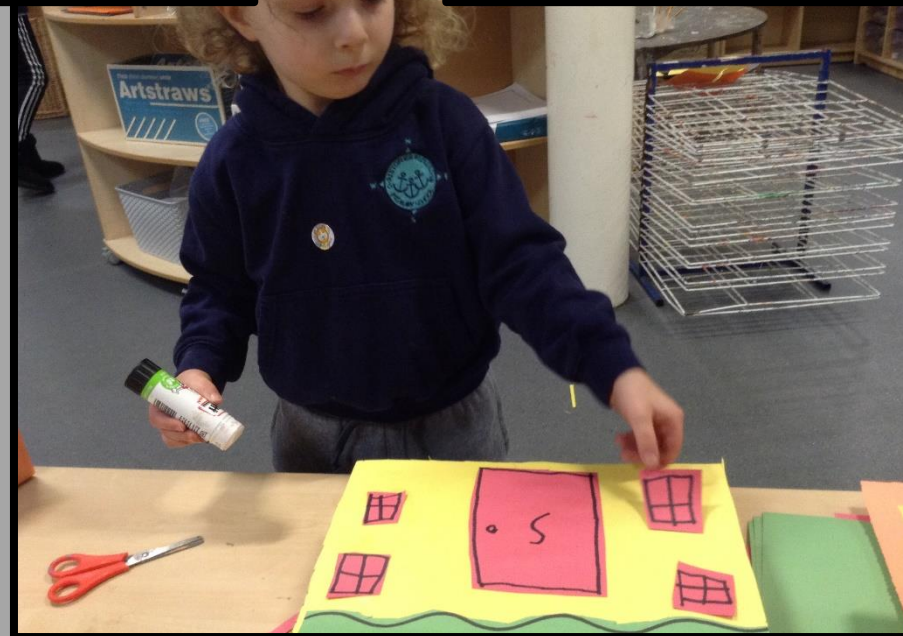

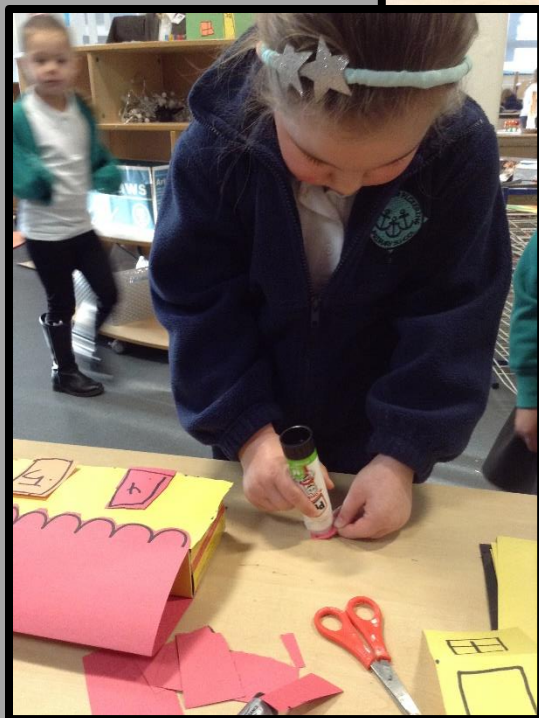

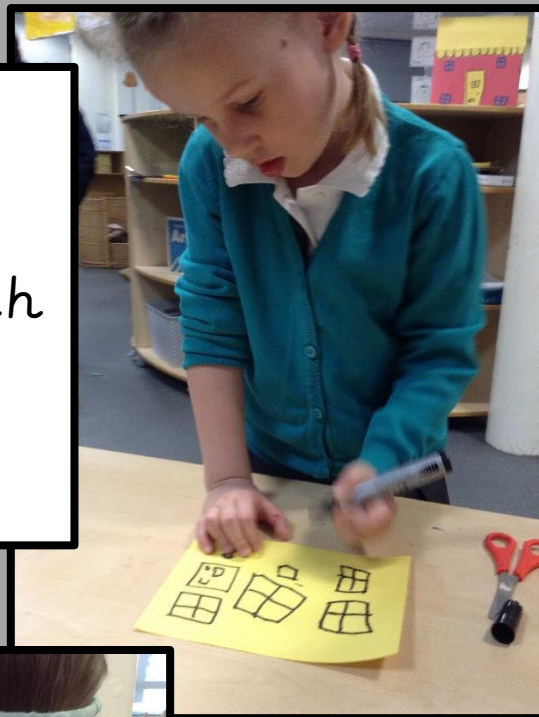

Cutting wavy, zig-zagged or bumpy lines out carefully.

Gluing on the front
of the fancy roof,
then using tape to
fix the back.

Designing windows and doors, then cutting out each shape and gluing it in place.

Wow! What fabulous houses we have made so far. Everyone was so proud of what they had done.
