

Week beginning 6th June 2022.

This week in F1...

This week the children have been learning all about the story 'Our Skin'. We have been talking about skin colour and how people have different colour skin. The children have been using their fine motor skills to make faces on our funky fingers table. The children have also had fun mixing different paints to create skin colours and have painted faces and handprints.

In Maths the children have been singing number 5 songs including 5 little speckled frogs, 5 currant buns, 5 little ducks and 5 little monkeys. The children have also been learning all about the number 4. We have been counting out 4 items, showing 4 fingers and linking the numerals 1-4 to the correct amounts.

In our Jigsaw lesson this week we have been learning about the names of our different body parts and talking about what we use them for such as using our eyes to see and our ears to listen.

In P.E this week the children have started practising for our sports day.

Next week we will be learning all about the world and different countries. For this weeks home learning, please could you attach a photograph of a different country if possible. This could be a picture of your child on holiday or on an aeroplane, or a family member who has been on holiday.
