

Week beginning 27th June 2022.

This week in FI...

This week the children have been learning all about India. On Monday the children helped to make a curry. They chopped the different vegetables and got to smell the different spices. We talked about how the vegetables would turn soft once they had been cooked.

On Tuesday, the children got to taste the curry for their snack. Some of the children thought it was delicious but some children were not so keen but still had a taste. The children also had fun playing in the home corner and dressing up in Indian clothes and talking about the different foods they have in India.

On Wednesday it was Foundation Stage's sports day! The children had lots of fun taking part in all of the different races and watching some of the Mummy's, Daddy's and younger siblings join in too!

On Thursday, the children were learning about the different animals that live in India. The children explored these different animals in the different areas around the classroom.

On Friday, the children were learning all about patterns. In Maths the children have been learning how to create patterns in various ways such as using body percussion (clap, stomp, clap, stomp) and using two different coloured building blocks.

Next week we will be learning all about America. Please could you upload any knowledge that your child has of America onto Tapestry and we will discuss this in our groups next week.
