

Week beginning 16th January 2023.

This week in Fl...

This week we have been learning all about Winter. On Monday we went on a Winter walk around the school. We looked for the different signs of Winter. In the afternoon we were super excited as it started to snow! We went outside while it was snowing and we were catching snowflakes on our tongues. We also had fun looking at the ice outside, some of our toys were stuck inside so we had to think of different ways to get them out. When we came back inside we enjoyed a nice cup of hot chocolate.

On Tuesday we were practising our cutting skills and were making snowflakes. We also talked about what we might wear in Winter.

On Wednesday, the children helped to create a beautiful Winter collage to go on display in our classroom. The children also had fun playing different instruments to create sounds of Winter.

In Maths we have been learning about the different shapes including a square, circle, triangle and a rectangle. We have been talked about how many corners and sides each shape have.

In Literacy we have been reading the story called 'This is our house'. We have been looking at the pictures in the book and discussing the main character.
