

Did you know that a butterfly's wings are the same on both sides? We looked at how we could do this by printing. It was almost like magic!

We talked about how we would paint just one side of the wings...

Everyone loved having a go.

Ella was very excited to have a go. She painted one colourful wing.

Then we folded the paper in half and gave it a good press.

When she opened it up, it was a beautiful butterfly!
