People who help us!

Meeting real-life firefighters was a very exciting experience for our Foundation Stage 2 children! We were thrilled to welcome the firefighters, who arrived in their big, bright red fire engine. The children were full of excitement and eager to learn all about the important work that firefighters do.

The firefighters showed us around their amazing fire engine and explained what all the different equipment is used for. One of the highlights of the day was getting to sit inside the cab of the vehicle. The children loved pretending to be firefighters and imagining they were rushing off to help people in an emergency.

We also had the chance to spray the large, powerful fire hose. The children were amazed by how strong the water pressure was and enjoyed taking turns having a go. It was a fantastic hands-on experience that helped us learn more about how firefighters keep our communities safe.

The firefighters spoke to us about their important job and answered lots of our questions. We learnt about the different ways they help people and how they stay safe while working.

Another exciting part of the visit was looking at the firefighters' special protective clothing. We explored their jackets, trousers, boots and helmets, and some children even had the opportunity to try them on. We noticed how heavy the equipment was and discussed why it is important for firefighters to wear it when attending emergencies.

F2 Meeting the Team!
