

SCIENCE COUNCIL FUN...

Why not give this a go over Christmas if you get a chance – it's a fun family science activity!

Name: _____		
How Far Can You Get Santa's Reindeer to Fly?		
Directions: After attaching the reindeer to a straw, see how far can you get it to travel.		
Supplies <ul style="list-style-type: none">• Straws• Reindeer Cut Out• Pipette• Tape• Scissors	How far did your reindeer fly? My reindeer flew _____ on my first attempt. My reindeer flew _____ on my second attempt. My reindeer flew _____ on my third attempt.	
Goal Find best ways to hold and blow out of the straw to get the reindeer to travel really far.	What made your reindeer fly the farthest? _____ _____ _____	

Conducting the Flying Reindeer Activity

Place your reindeer picture (one to print and cut below or make your own) onto the straw and give it a good hard blow. (We found that the reindeer travelled the farthest when we lay prone on the ground.) You or your children will need to place a measuring tape out on the floor and use it to measure the distance your reindeer travel. Who will win?
