

FREE National Science Week

GREEN SHIFT
Education CIC

Science workshop

(funded by the British Science Association)

Who is this for: primary school children from Hebburn

When and where will this take place: 10.30 am - 12 noon on Saturday 16th March at Hebburn Central (Hub)

Come and have some terrific scientific fun in this 90 minute fully funded workshop. Children will make some slime and a bathbomb to take home with them.

This session will be delivered by fully qualified, experienced teachers (and scientists) who have DBS (police) clearance, are fully insured and are paediatric first aid and safeguarding trained.

Places are limited (30) and must be pre-booked in advance. We would love it if a parent/carer could stay with the child and work with them. Use the following link to book your tickets:
