

E-Safety News

Across this week we have had a focus on Computing across school.

A big part of the curriculum is looking at E-Safety and making our children aware of the potential risks and dangers associated with computer use and of course the internet. Below are some information websites that may be able to support you at home, but of course please remember that you can always speak to a member of staff too if you have any questions or concerns. We have also shared some of the fantastic work from in school this computing week too! The Local Authority ICT in Schools Team also have an amazing website—please take a look!

<https://southtyneside.onlinesafetyhub.uk/>

We are a registered Kidsafe School and our lead on Kidsafe is **Mrs Davies**. Kidsafe is a child friendly, preventative children's mental health and safeguarding curriculum, that is delivered to all year groups across the Spring and Summer Terms in school. Within the sessions, there are discussions about e-safety and age ratings of computer games and movies to help make our children aware of why ratings are in place. Once your child's class begins Kidsafe, a letter will be sent to you. Any questions, please let us know!

useful websites to take a look at....

There are many useful websites to take a look at to provide some extra information about keeping safe when using computers/internet.

Computing Week 2025!

All Year groups have been reading the story Chicken Clicking which talks about the importance of not sharing details to others.

Year 1 used floor Bee Bots as well as the Ipad programme to make up algorithms for partners to follow. They also designed their own safety poster!

Our **Reception** children enjoyed using the floor bots to programme through their own

Year 2 used the Now Press Play headphone sets to be a part of an online lesson. It reinforced the messages of not sharing personal information online. These are really important messages
