Scientific Enquiry

Progression of Knowledge and Skills in Science  
EYFS-Upper KS2

Skills Objectives

(5 types of enquiry skills - observation over time, pattern seeking, identifying, classifying and grouping, Comparative and fair testing, Research using secondary sources)

EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Planning						
<p>Having their own ideas– thinking of ideas; finding ways to solve problems; finding new ways to do things</p> <p>Making predictions</p> <p>Planning making decisions about how to solve a problem and reach a goal</p>	<p><i>Ask simple questions when prompted</i></p> <p><i>Suggest ways of answering a question</i></p>	<p>Ask simple questions</p> <p>Recognise that questions can be answered in different ways</p>	<p><i>Ask relevant questions when prompted</i></p> <p><i>Set up simple and practical enquiries, comparative and fair tests</i></p> <p><i>Set up comparative tests</i></p>	<p>Ask relevant questions</p> <p>Plan different types of scientific enquiries to answer questions</p> <p>Set up simple and practical enquiries, comparative and fair tests</p>	<p><i>With prompting, plan different types of scientific enquiries to answer questions</i></p> <p><i>With prompting, recognise and control variables where necessary</i></p>	<p>Plan different types of scientific enquiries to answer questions</p> <p>Recognise and control variables where necessary</p>
Conducting Experiments						

Progression of Knowledge and Skills in Science  
EYFS-Upper KS2

<p>Testing their ideas.</p> <p>Children use everyday language as they explore to talk about size, weight, capacity. They explore characteristics of everyday objects and shapes</p> <p>Children explore different materials freely, to develop their ideas about how to use them.</p> <p>Return to and build on their previous learning, refining ideas and developing their ability to represent them.</p>	<p><i>Make relevant observations</i></p> <p><i>Conduct simple tests, with support</i></p>	<p>Observe closely, using simple equipment</p> <p>Perform simple tests</p>	<p><i>Make systematic observations, using simple equipment</i></p> <p><i>Use standard units when taking measurements</i></p>	<p>Make systematic and careful observations using a range of equipment, including thermometers and data loggers</p> <p>Take accurate measurements using standard units, where appropriate</p>	<p><i>Select, with prompting, and use appropriate equipment to take readings</i></p> <p><i>Take precise measurements using standard units</i></p>	<p>Take measurements using a range of scientific equipment</p> <p>Take measurements with increasing accuracy and precision</p> <p>Take repeat readings when appropriate</p>
<p>Recording Evidence</p>						
<p>Developing ideas of grouping, sequencing, cause and effect</p> <p>Children talk about the differences between materials and changes they notice</p>	<p><i>With prompting, suggest how findings could be recorded</i></p>	<p>Record and communicate their findings in a range of ways and begin to use simple scientific language</p>	<p><i>Record findings in various ways</i></p> <p><i>With prompting, suggest how findings may be tabulated</i></p> <p><i>With prompting, use various ways of recording, grouping and displaying evidence</i></p>	<p>Record findings using simple scientific language, drawings and labelled diagrams</p> <p>Record findings using keys, bar charts, and tables</p> <p>Gather, record, classify and present data in a</p>	<p><i>Take and process repeat readings</i></p>	<p>Record data and results of increasing complexity using scientific diagrams and labels</p>

Progression of Knowledge and Skills in Science  
EYFS-Upper KS2

				variety of ways to help to answer questions		
Reporting Findings						
<p>Making links and noticing patterns</p> <p><u>Speaking:</u> Learn new vocabulary. Use new vocabulary through the day. Articulate their ideas and thoughts in well formed sentences. Use talk to help work out problems and organise thinking and activities, and to explain how things work and why they might happen.</p> <p><u>Understand the world:</u> Children can talk about the differences between materials and changes they notice.</p>	<i>Recognise findings</i>	Identify and classify	<p><i>With prompting, suggest conclusions from enquiries</i></p> <p><i>Suggest how findings could be reported</i></p>	<p>Report on findings from enquiries, including oral and written explanations, of results and conclusions</p> <p>Report on findings from enquiries using displays or presentations</p>	<p><i>Record data and results</i></p> <p><i>Record data using labelled diagrams, keys, tables and charts</i></p> <p><i>Use line graphs to record data</i></p>	<p>Report and present findings from enquiries, including conclusions and causal relationships</p> <p>Report and presents findings from enquiries in oral and written forms such as displays and other presentation</p> <p>Report and present findings from enquiries, including explanations of, and degree of, trust in results</p>
Predictions and Conclusions						

Progression of Knowledge and Skills in Science  
EYFS-Upper KS2

<p>Checking how well their activities are going</p> <p>Changing strategy as needed</p> <p>Reviewing how well the approach worked</p> <p><u>Understanding:</u> Understand 'why' questions, like: "why do you think the caterpillar got so fat?"</p> <p>Children can discuss similarities and differences between living things, objects and materials.</p>	<p><i>Gather and record data</i></p> <p><i>Use observations to suggest answers to questions</i></p>	<p>Gather and record data to help answer questions</p> <p>Use their observations and ideas to suggest answers to questions</p>	<p><i>Suggest possible improvements or further questions to investigate</i></p>	<p>Identify differences, similarities or changes related to simple scientific ideas and processes</p> <p>Use straightforward scientific evidence to answer questions or to support their findings</p> <p>Use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions</p>	<p><i>Report and present findings from enquiries, including conclusions and, with prompting, suggest causal relationships</i></p> <p><i>With support, present findings from enquiries orally and in writing</i></p> <p><i>Suggest further comparative or fair tests</i></p>	<p>Identify scientific evidence that has been used to support or refute ideas or arguments</p> <p>Use test results to make predictions to set up further comparative and fair tests</p>

EYFS-Upper KS2

	<p>summer/spring/autumn/winter? How long are the days in summer/spring/autumn/winter? What things might you see on an autumn walk? What foods might you eat in the winter? What things might you see on a spring walk? What happens to the temperature in spring and summer? How do you keep safe in the sun? What activities might you do in the summer?</p> <p><b>Animals including humans:</b> What is a life cycle? What do all animals need to survive? What does the word offspring mean? What do fish, birds and reptiles have in common? How do animals, including humans stay healthy? What do humans need to survive? Can you name the 5 senses? What do these 5 senses help humans do?</p>	<p>of water or space? How are seeds dispersed in a dandelion?</p> <p><b>Sound:</b> How does sound travel? What does the pitch of a sound describe? What happens when a sound hits the ear? What happens if you move closer to a sound?</p> <p><b>Light:</b> How many different electrical sources can you name? How are shadows formed? What happens to a shadow if a light source is very close to an object? How can we protect our eyes from the sun?</p> <p><b>Animals including humans:</b> How do animals including humans get the correct amount of nutrition they need? There are seven types of nutrients? What are these and how do they help keep humans healthy? Can you get more than one nutrient from one type of food? Why do animals including humans need a skeleton? What would happen if you did not have a skeleton? What is an endoskeleton and an exoskeleton? How do muscles work? Why do we need to look after our teeth and what is decay? What are the three types of teeth that humans have? What is saliva and why do animals including humans need this to eat? Where does the digestive system begin? How does food travel from the mouth to the stomach? Which part of the body absorbs the nutrients? What happens to food that the body no longer needs? Why is exercise so important?</p> <p><b>Food chains:</b></p>	<p>What did Charles Darwin's work on finches tell us? What type of information can we learn from a fossil? What characteristics might we inherit from our parents? What do we not inherit from our parents?</p> <p><b>Properties and changes in materials:</b> What would be the best material to wrap an ice cube in to stop it from melting? What is a variable in an investigation? Can you think of two changes that are irreversible? Can you explain the difference in particle structure between solids, liquids and gasses? How does this impact their behaviour?</p> <p><b>Earth and space:</b> Can you name all of the planets in order of their distance from the sun? What is a solar eclipse and why does it occur? How long does it take for the earth to orbit the sun? What causes day and night? Why do we have high and low tides?</p> <p><b>Light:</b> How many objects can you see in the classroom that are opaque? Can you explain in 3 sentences how we see an object? How do mirrors make it possible to see things through a periscope? Can you give another example of how mirrors are useful to humans?</p> <p><b>Animals and humans:</b> How is the circulatory system made up? How does your pulse change when you exercise? What are the main stages of the human life cycle? What changes might be expected during puberty? Why do humans take so long to walk following birth compared to other animals?</p>

EYFS-Upper KS2

- Initiation

This model will be used alongside children's individual EHCP and Pupil Progress Plans to plan for and assess children's progression across the bespoke curriculum that they are able to access in line with their strengths and needs.

### Identifying **end-points**

These **end-points**, the foundational knowledge on which our **curriculum** is built, may be derived from the assessment objectives or learning outcomes for that subject as defined by Ofqual and awarding bodies, or may be the key concepts that the teachers of that subject deem most important.

What is the understanding of mastery and where do the most able children end?

- Children should understand that science has changed our lives and is vital to the world's future prosperity, and all pupils should be taught essential aspects of the knowledge, methods, processes and uses of science.
- Through building up a body of key foundational knowledge and concepts, pupils should be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena.
- Children should be encouraged to understand how science can be used to explain what is occurring, predict how things will behave, and analyse causes.
- Children should develop scientific knowledge and conceptual understanding through the specific disciplines of biology, chemistry and physics
- Children will develop an understanding of the nature, processes and methods of science through different types of science enquiries that help them to answer scientific questions about the world around them.
- Science lessons should ensure that children are equipped with the scientific knowledge required to understand the uses and implications of science, today and for the future.
- Science is important across the curriculum and reflects the importance of children's spoken language, cognitively, socially and linguistically. The quality and variety of language that pupils hear and speak are key factors in developing their scientific vocabulary and articulating scientific concepts clearly and precisely.

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
