

**Project Homework**

**Due Thursday 16th March 2017**

In project we have been looking at different materials, and thinking about how some materials are more suitable when building a house than others! You have been thinking about how a house could be created so it is disaster proof.

**Task:**

- We would like you to go on an **investigation in your home!**
- What materials are the different parts of your home are built from?
- Think about what the **walls, doors, floor, roof and windows** are made from!
- Use the diagram below to label the outside parts of the house. Use the space to draw and label any other materials, whether you live in a flat, house, apartment or maisonette, where you live would have been built with lots of different materials!

<u>Roof</u>	<u>Outside walls</u>	<u>Inside walls</u>	Other: _____
<u>Doors</u>	<u>Windows</u>	<u>Floor</u>
