

The Back to School Mystery of the Cloakroom Chaos

The pupils of Sunny Coast Primary School have had a wonderful summer break. Year 3 are excited to be in the juniors and year 4 are glad they're not the youngest in KS2 anymore.

They have missed their friends and are looking forward to swapping holiday mishap stories, tales about their brothers and sisters and worries about the homework they haven't done!

They pile into the shared cloakroom and locate where their peg is this year. They hang up their PE bag and new school coats, with warnings from their parents not to let their coats end up on the floor. They stumble into their new classroom and wait for the day to begin.

The bell rings a few hours later and they pile out to the cloakroom to collect their coats. Wait, oh no! Disaster has struck! Someone has naughtily swapped all the PE bags and coats around! No one can find anything and complete cloakroom chaos ensues!

A number of people were discovered to have been out of classes during the first session.

Your task is to use the suspect descriptions and solve the clues to identify the mystery cloakroom chaos creator!

Good luck!

Clue 1: Match and Repeat

The cloakroom coat changer must have had something on their fingers when they swapped the coats around.

Solve the clue to find out what it was.

Match up the multiplication statements with the repeated addition statements.

Use the words in the table to solve the first clue.

4×6	10×2	5×7	6×8	3×4	8×2	4×2	3×6
$8 + 2 + 8$ were	$10 + 10 + 10$ chewy bar	$4 + 4 + 4$ smeared					
$2 + 2 + 2 + 2$ coat	$3 + 3 + 3$ jellies	$2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 + 2$ was					
$6 + 6 + 6$ chocolate	$6 + 6 + 6 + 6 + 6$ they	$6 + 6 + 6 + 6$ found					
$7 + 7 + 7 + 7 + 7$ on	$2 + 2 + 2 + 2 + 2 + 2 + 2 + 2$ pegs	$8 + 8 + 8 + 8 + 8 + 8$ the					
	$5 + 5 + 5 + 5 + 5$ sherbet						

Answer to Clue 1: _____

Clue 2: More or Less

Use these signs $<$ $>$ in these number statements.

$$46 + 16 \quad \square \quad 23 + 35$$

$$5 \times 3 \quad \square \quad 3 \times 2$$

$$53 - 19 \quad \square \quad 67 - 29$$

$$2 \times 8 \quad \square \quad 4 \times 3$$

$$50 \div 10 \quad \square \quad 24 \div 2$$

$$24 + 14 \quad \square \quad 52 - 11$$

$$4 \times 5 \quad \square \quad 10 \times 3$$

$$25 \div 5 \quad \square \quad 20 \div 2$$

If there are more $>$ signs, the culprit is in year 3.

If there are more $<$ signs, the culprit is in year 4.
