

# Notes for Teachers

- Using the choice screen children choose a winter themed picture.
- When the child clicks the picture it links through to a calculation with an answer between 1 and 5.
- The action button control the speed of the presentation which gives plenty of time to work through each slide.
- There is a reveal button for each answer so this gives children as much time as they need to work out the answer and put their hands/ write on dry wipe boards.
- When you click the home button you will return to the choice slide and the pictures already chosen will fade away, minimising choice.
- Alternatively you can work through the slides one after the other by using the blue arrow at the bottom of each slide.
