

# Habitats

7 Habitats are places where animals and plants  
16 live. Most mammals live on land but they can  
24 be found in many different types of habitats.

## 25 **Underground**

32 Moles are small mammals that spend most of  
39 their time underground. They have wide feet  
43 and sharp claws.

## 44 **Trees**

51 The heaviest mammals to live in trees  
59 are orangutans. They spend a lot of time  
65 swinging through the trees and gathering  
68 food to eat.

## 69 **Sea**

78 Whales and dolphins live in the sea but they  
88 need to come out of the water to breathe air.  
96 They have blowholes on top of their head  
101 that help them do this.

# Quick Questions

1. Draw **three** lines and match each animal to where it lives.

orangutans

underground

moles

sea

whales

trees

2. Why do you think that moles have wide feet and sharp claws?

---

---

---

3. Find and copy one word that shows something weighs a lot.

---

4. Predict what another sub-heading in this text could be.

---

---

# Answers

1. Draw **three** lines and match each animal to where it lives.

2. Why do you think that moles have wide feet and sharp claws?  
**Pupils' own responses, such as: I think that moles have wide feet and sharp claws to help them dig through the soil.**

3. Find and copy one word that shows something weighs a lot  
**heaviest**

4. Predict what another sub-heading in this text could be.  
**Pupils' own responses, such as: I think that another sub-heading could be 'on the ground'.**
