

14 July 2022
18.00-20.00
XP East School
Doncaster

Why do we need to develop a sustainable energy plan for the planet?

This, the inaugural XP Climate Conference is a wonderful opportunity for people with an interest in climate change to come to the school to learn more about the climate emergency, what is currently happening to tackle this, and future plans at local, national and international level.

Event agenda

18:00 Introduction

XP/XPE Students welcome you to the evening.

18:10 Keynote

XP/XPE students will deliver the keynote speech on the climate emergency, highlighting the plight of the planet on its current trajectory. They will use information learned in their expedition 'Power to the People' in terms of science and mathematical modelling to present the challenges ahead.

18:30 Expert Panel interview

Students will interview an expert panel with pre-prepared questions which panellists will have seen and been able to prepare for in front of the audience. The purpose of this is to get an expert understanding of the climate emergency and information on actions needed to tackle this on the local, national and international scale.

19:00 Information Pods: Circulate and join the conversation

The conference will play host to various stands set up to provide information across areas including the following: energy and its production (sustainable and renewables), fossil fuels, the Greenhouse effect, global case studies, emerging technologies, climate change and ways to tackle it, local business leaders explaining their contribution to fighting climate change, DMBC publishing the local climate action plan.

19:45 Closing statements

Students from XP/XPE will deliver closing statements and climate pledges to the audience.

19:55 'Dear World' performed by The Children of XP Trust

A performance of the charity single, 'Dear World', sang by XP Trust's primary school students.
