

GEOGRAPHY

A LEVEL

OCR

Entry Requirements	GCSE Geography Grade 6 essential, English and Maths at Grade 5 desirable GCSE APS of 4.5 minimum
Head of Department or Course Contact	Mrs L Llewellyn
Contact E-Mail Address	lllewellyn@stedmunds.org

Brief introduction to subject:

Geography combines well with almost all other subjects. Although Geography has a unique suite of skills and knowledge, many skills and topic areas are transferrable and will actively support other subjects. The newly written specification for A level provides a comprehensive overview of many topics in geography and allows for a fast-paced, dynamic learning environment that will prepare you for life at university or in the workplace.

Progression to Career/ University Courses:

We currently teach the OCR specification at A Level, it is a dynamic course which explores the key principles, concepts and processes that allow us to understand the world in which we live. The course offers a balance between physical and human geography while ensuring relevance to the modern world. There are opportunities to undertake fieldwork as part of the course, currently a field trip is offered to London in Year 12.

Key Points:

Many students continue to study Geography at university. There are very few careers for which Geography does not provide a valuable background. Geography offers skills and knowledge that are directly transferable into many careers and subject areas.

Skills

Really useful, transferable skills are developed, including:

- Essay writing
- Time management
- Geographical and map skills including GIS.
- Accurate note taking
- Active listening

A post-16 Geography qualification is useful and relevant for many careers, such as:

- Management and Administration
- Leisure, Travel and Tourism
- Education, Professional and Social Services
- Business and Finance
- Environmental Management
- Scientific and Information Services
