# Year 12: Sculptural fashion project

Preksha

## SCULPTURE : NATURE

**STEP BY STEP PROCESS:**

**Step 1**  
The first step was to cut two pieces of calico and stretch that in the same size. Then I drew the shape of the leaf on the calico and traced the mesh between the two piece of calico by sewing grids.

**Step 2**  
The second step was to cut out the leaf shape. Then using brown fabric I cut out the leaf and a small piece of fabric to use as the stem. Then I attached the fabric around to the other side of the leaf.

**Step 3**  
The first step for the rose was that, all the corners of the fabric I started to do turning stitches through the whole length of the fabric. When doing the turning I made sure you have to fold that your stitches are a little tight so that the fabric starts to gather up. After you are finished gathering up, you can have to fold the front of the fabric, making the first look like a small flower. Then you start stitching the fabric and you will see that you have wanted to form your rose. The last step is to attach the stem together using brown fabric.

**FINAL OUTCOME:**

**MOOD BOARD:**

**SAMPLE:**

**DESIGN 1:**

**DESIGN 2:**

**COLOR PALETTE:**
