

<u>A-Level Maths</u>					
Full course title and Exam Board	Pearson Edexcel Mathematics	Specification QR 			
Teacher(s)	Ms L Paraskeva – Head of Department lparaskeva@enfieldgrammar.org Mr V Yildiz, Ms K Mageswaran, Mr A Kodjoe, Ms N Khan, Ms G Gunes				
Introduction	As well as being a fascinating subject in itself that will help you unlock the mysteries of science, technology and statistics, studying mathematics offers higher earning potential, exciting career opportunities and a grounding in important life skills. If you want to study a STEM subject at university, you may need to have an A Level in Maths under your belt. Today, many of the most exciting new careers require a foundation in mathematics. Game design, app development, astronomy – some of the most stimulating job roles are filled with mathematics specialists, and you can bet that future developments in technology will open up occupations that haven't even been invented yet.				
What is the course about?	A level Mathematics is an interesting and challenging course which extends the methods you learned at GCSE and includes optional applications of mathematics, such as Statistics, and Mechanics. Statistics – Collecting and analysing data and using this to make predictions about future events. Many subjects make use of statistical information and techniques. An understanding of probability and risk is important in careers like insurance, medicine, engineering and the sciences. Mechanics – Modelling and analysing the physical world around us, including the study of forces and motion. Mechanics is particular useful to students studying physics and engineering.				
How will I be assessed and what will I be studying?	<p>The department will follow The Pearson Edexcel Level 3 Advanced GCE in Mathematics, which consists of three externally examined papers. Students will be completing the following papers at the end of their final year in May/June. All three papers are: written examination, 2 hours, 33.33% of the qualification, and 100 marks. Calculators can be used in all 3 examinations.</p> <table border="1" style="width: 100%; background-color: #e6f2ff;"> <tbody> <tr> <td style="width: 33%; padding: 5px;"> Paper 1: Pure Mathematics 1 (*Paper code: 9MA0/01). Proof, Algebra and functions, Coordinate geometry in the (x,y) plane, Sequences and series, Trigonometry, Exponentials and logarithms, Differentiation, Integration, Vectors. </td> <td style="width: 33%; padding: 5px;"> Paper 2: Pure Mathematics 2 (*Paper code: 9MA0/02). Proof, Algebra and functions, Coordinate geometry in the (x,y) plane, Sequences and series, Trigonometry, Differentiation, Integration, Numerical methods. </td> <td style="width: 33%; padding: 5px;"> Paper3: (*Paper code: 9MA0/03) Section A: Statistics Statistical sampling, Data presentation and interpretation, Probability, Statistical distributions, Statistical hypothesis testing Section B: Mechanics Quantities and units in mechanics, Kinematics, Forces and Newton's laws, Moments. </td> </tr> </tbody> </table>		Paper 1: Pure Mathematics 1 (*Paper code: 9MA0/01). Proof, Algebra and functions, Coordinate geometry in the (x,y) plane, Sequences and series, Trigonometry, Exponentials and logarithms, Differentiation, Integration, Vectors.	Paper 2: Pure Mathematics 2 (*Paper code: 9MA0/02). Proof, Algebra and functions, Coordinate geometry in the (x,y) plane, Sequences and series, Trigonometry, Differentiation, Integration, Numerical methods.	Paper3: (*Paper code: 9MA0/03) Section A: Statistics Statistical sampling, Data presentation and interpretation, Probability, Statistical distributions, Statistical hypothesis testing Section B: Mechanics Quantities and units in mechanics, Kinematics, Forces and Newton's laws, Moments.

Future Career Directions	Mathematics is key to most scientific disciplines so it could lead onto higher education courses in science related subjects as well as Mathematics, Engineering, Computer Science and Economics. With further training, you could go into a job related to Mathematics such as an Accountant, Engineer, Financial Adviser, Business Manager, Software Engineer or Teacher. You could also go straight into a job as the 'A' Level is a recognised qualification that will help you develop the skills, understanding and knowledge that many employers across lots of industries are looking for.				
Subject Entry Requirements	Grade 7 in GCSE Mathematics.
