

Marden High School

Wednesday 15th December 2021

Dear All,

I hope this update finds everybody well, and that children in Years 7, 8 and 9 have enjoyed or are looking forward to being with their peers in school or at the Langdale Centre this week. The plan for January, whilst by no means complete and detailed, is starting to take shape, and involves a hybrid solution of temporary accommodation (on and off school site) and increasing the use of space within our building.

This solution will enable all our students to come back into full time face to face education with their teachers within the shortest time possible in the new year, whilst work is then undertaken on the roof replacement.

Students have been well served by the remote learning provided by their teachers and while we want to keep home learning to an absolute minimum, it may well be that we will need to provide some of this as we wait for solutions outlined above to be made ready for students.

I do appreciate everyone's support and patience in this matter and rest assured that, as we have more detail and certainty on dates, times and locations, I will keep everyone updated this week and over the holiday period.

Thank you for your continued support and take care.

Mr M. Snape
Head Teacher
