

Marden High School

E-Safety Policy

Introduction

The purpose of this document is intended to address the use in Marden High School (referred to as 'the School') by users (including but not limited to Employee, students, Visitors, Contractors) of the Internet and specifically E-Safety. This document applies to all users of the School IT System and applies to all use of the internet and forms of electronic communication such as email, mobile phones and social media sites.

The School recognises the benefits and opportunities which new technologies offer to teaching and learning. We provide internet access to all learners and staff and encourage the use of technologies in order to enhance skills, promote achievement and enable lifelong learning. However, the accessibility and global nature of the internet and different technologies available mean that we are also aware of potential risks and challenges associated with such use.

Our approach is to implement appropriate safeguards within the School while supporting staff and learners to identify and manage risks independently and with confidence. We believe this can be achieved through a combination of security measures, training, guidance and implementation of our policies. In line with our duty to safeguard learners, we will do all that we can to make our learners and staff stay e-safe and to satisfy our wider duty of care. This e-safety guidance should be read alongside other relevant college policies; **Safeguarding and ICT Acceptable Use Policy.**

1.Roles & Responsibilities

All staff are responsible for ensuring the safety of learners and should report any concerns immediately to their line manager. When informed about an e-safety incident, staff members must take particular care not to guarantee any measure of confidentiality towards either the individual reporting it, or to those involved. The first point of contact should be ICT Support.

All learners must know what to do if they have e-safety concerns and who to talk to. In most cases, this will be a teacher within school.

Where any report of an e-safety incident is made, all parties should know what procedure is triggered and how this will be followed up. Where management considers it appropriate, the safeguarding officer may be asked to intervene with appropriate additional support from external agencies.

The Safeguarding Lead is the main contact for safeguarding within the School, with the Director of ICT Systems also able to offer advice and guidance on technical related matters.

Staff

All staff are responsible for using school IT systems and mobile devices in accordance with the School ICT Acceptable Use Policy and the e-safety Guidance, which they must acknowledge acceptance of.

Staff are responsible for attending staff training on e-safety and displaying a model example to learners at all times through embedded good practice.

All digital communications with learners must be professional at all times and be carried out in line with the school ICT Acceptable Use Policy. Online communication with learners should be restricted to using Google's G Suite for Education.

External platforms not hosted by the School, such as social media sites, may be used following consultation with the Headteacher and the Director of ICT Systems.

This document will, however, be monitored and kept under review.

All staff should apply relevant school policies and understand the incident reporting procedures. Any incident that is reported to or discovered by a staff member must be reported to ICT Support and/or Headteacher without delay.

Learner

Learners are responsible for using the School IT systems and mobile devices in accordance with the school ICT Acceptable Use Policy and e-Safety Rules. Learners must acknowledge and accept both of these documents.

Learners must act safely and responsibly at all times when using the internet and/or mobile technologies.

They are responsible for responding to e-safety information and are expected to know and act in line with other relevant school policies e.g. mobile phone use, sharing images, cyber-bullying etc. They must follow reporting procedures where they are worried or concerned, or where they believe an e-safety incident has taken place involving them or another member of the School community.

2. Security

The School will do all that it can to make sure the School network is safe and secure. Every effort will be made to keep security software up to date. Appropriate security measures will include the use of enhanced filtering and protection of firewalls, servers, routers, workstations etc. to prevent accidental or malicious access of school

systems and information. Digital communications, including email and internet postings, over the School network, may be monitored in line with the ICT Acceptable Use Policy.

3. Behaviour

The School will ensure that all users of technologies adhere to the standard of behaviour as set out in the ICT Acceptable Use Policy.

The School will not tolerate any abuse of IT systems. Whether offline or online, communications by staff and learners should be courteous and respectful at all times. Any reported incident of bullying or harassment or other unacceptable conduct will be treated seriously and in line with the student and staff disciplinary procedures.

Where conduct is found to be unacceptable, the School will deal with the matter internally. Where conduct is considered illegal, the School will report the matter to the police.

4. Communications

The School requires all users of IT to adhere to the School ICT Acceptable Use Policy (which includes Social Media). Any extension of this guidance will require express written permission of a member of SLT.

5. Use of Images and Video

The use of images, or photographs, is popular in teaching and learning and should be encouraged where there is no breach of copyright or other rights of another person (e.g. images rights or rights associated with personal data). This will include images downloaded from the internet and those belonging to staff or learners.

There are particular risks where personal images of themselves or others are posted onto social networking sites, for example. Advice should be sought by teachers / line managers where required.

The School teaching staff will provide information to learners on the appropriate use of images. This includes photographs of learners and staff as well as using third party images. Our aim is to reinforce good practice as well as offer further information for all users on how to keep their personal information safe.

No image/photograph can be copied, downloaded, shared or distributed online without permission.

Photographs of activities on the School premises should be considered carefully and have the consent of the student / subject before being published. Approved photographs should not include names of individuals without consent.

6. Personal Information

Personal information is information about a particular living person. The School collects and stores the personal information of learners and staff regularly e.g. names, dates of birth, email addresses, assessed materials and so on. The School will keep that information safe and secure and will not pass it onto anyone else without the express permission of the learner / parent / carer.

No personal information can be posted to the School website unless it is in line with our Data Protection Policy.

All school mobile devices such as a laptop, USB (containing personal data) require to be encrypted, password protected and a member of ICT Support should be consulted before the data leaves the premises.

Where the personal data is no longer required, it must be securely deleted in line with the Data Protection Policy.

7. Information and Training

With the current unlimited nature of internet access, it is impossible for the School to eliminate all risks for staff and learners. It is our view therefore, that the School should support staff and learners stay e-safe through regular training and education. This will provide individuals with skills to be able to identify risks independently and manage them effectively.

For learners

Issues associated with e-safety apply across the curriculum and learners should receive guidance on what precautions and safeguards are appropriate when making use of the internet and technologies.

Learners will be made aware of what to do and who to talk to where they have concerns about inappropriate content, either where that material is directed to them, or where it is discovered as part of a random search.

For staff

Any new or temporary users will receive training on the School IT system as part of their induction.

8. Incidents and Response

Where an e-safety incident is reported to the School this matter will be dealt with very seriously. The school will act immediately to prevent, as far as reasonably possible,

any harm or further harm occurring. If a learner wishes to report an incident, they can do so to any teacher or member of staff. Where a member of staff wishes to report an incident, they must contact their line manager as soon as possible.

Following any incident, the School will review what has happened and decide on the most appropriate and proportionate course of action. Sanctions may be put in place, external agencies may be involved or the matter may be resolved internally depending on the seriousness of the incident. This is in line with the School ICT Acceptable Use Policy. Serious incidents will be dealt with by senior management, in consultation with appropriate external agencies.

To be Reviewed: September 2023

Approved by Governors: September 2022
